Medieval Islamic Swords And Swordmaking:

Medieval Islamic Swords and Swordmaking Brian Gilmour, Robert Hoyland, 2012-05-30 One of the problems pervading the study of medieval Islamic technology is the lack of surviving technical treatises. Tradition tended to be handed down by example and by word of mouth and apprenticeships could last for decades. Fortunately however occasional treatises do exist. The treatise *e On swords and their kindse* was written by the 9th century Muslim philosopher Ya qub ibn Ishaq al Kindi. This work was commissioned by a powerful patron of scholarship the Abbasid caliph Mu'tasim and the content of the treatise presumably reflects the ruler's general interest in his army and its equipment and his specific interest in the technical aspects of sword production. In this work Kindi discusses the difference between iron and steel, distinguishes different qualities of sword blade and different centres of swordsmithing. He refers to the Indian Ocean trade in steel ingots and to the distinctive character of European swords of the period. He includes technical terms used by the makers and distinguishes swords by their physical features: form, measurements, weight, watered pattern, sculptured details or inlaid ornaments. This publication includes the text and a translation of Kindi's treatise and a detailed commentary on the work. The volume also includes a translation of Friedrich Schwarzlose's work on swords which is based on the hundreds of references to swords in early Arabic poetry. Written in German this extraordinary compendium of information was first published some 120 years ago; this volume makes it available again and for the first time in English. **Medieval Islamic Swords and Swordmaking** Brian Gilmour, Robert Hoyland, 2012-05-30 One of the problems pervading the study of medieval Islamic technology is the lack of surviving technical treatises. Globalism

in the Middle Ages and the Early Modern Age Albrecht Classen,2023-09-05 Although it is fashionable among modernists to claim that globalism emerged only since ca 1800 the opposite can well be documented through careful comparative and transdisciplinary studies as this volume demonstrates offering a wide range of innovative perspectives on often neglected literary philosophical historical or medical documents Texts images ideas knowledge and objects migrated throughout the world already in the pre modern world even if the quantitative level compared to the modern world might have been different In fact by means of translations and trade for instance global connections were established and maintained over the centuries Archetypal motifs developed in many literatures indicate how much pre modern people actually shared But we also discover hard core facts of global economic exchange import of exotic medicine and on another level intensive intellectual debates on religious issues Literary evidence serves best to expose the extent to which contacts with people in foreign countries were imaginable often desirable and at times feared of course The pre modern world was much more on the move and reached out to distant lands out of curiosity economic interests and political and military concerns Diplomats crisscrossed the continents and artists poets and craftsmen traveled widely We can identify for instance both the Vikings and the Arabs as global players long before the rise of modern globalism so this volume promises to rewrite many of our traditional notions about pre modern worldviews economic conditions and the literary sharing on a global level as perhaps best expressed by the genre of the fable
