Technology, Crafting and Artisanal Networks in the Greek and Roman World Diego Elia, Eleni Hasaki, Marco Serino, 2024-12-02 This volume aims to merge theoretical models with methodological approaches on ceramic technology and artisanal networks in the Classical world This convergence of analytical frameworks allowed scholars to explore some traditional archaeological topics that usually have a very low level of visibility such as the skillful gestures of the craftspeople involved the organization of the ceramic production the dynamics of apprenticeship and knowledge transfer as well as intra and inter regional artisanal mobility in the Graeco Roman communities of practice The papers promote interdisciplinary dialogues among various fields of study such as archaeology archaeometry anthropology ethnoarchaeology experimental archaeology and digital humanities such as Social Network Analysis computational imaging and big data analysis

Environment and Habitation around the Ancient Black Sea David Braund, Vladimir F. Stolba, Ulrike Peter, 2021-05-10 Environment and human habitation have become principal topics of research with the growing interest in the Black Sea region in antiquity This book highlights their interaction around all the coasts of the region from different perspectives and disciplines Here archaeological excavation and survey combine with studies of classical texts cults medicine and more to explore ancient experiences of the region Accordingly the region is examined from external viewpoints centred in the Mediterranean Herodotus the Hippocratics ancient geographers and poets and through local lenses particularly supplied by archaeology While familiar disconnects emerge there is also a striking coherence in the results of these different pathways into the study of local environments which embrace not only Graeco Roman settlement but also a broader range of agricultural and pastoralist activities across a huge landscape which stretches as far afield as ancient Hungary Throughout there are methodological implications for research elsewhere in the ancient world This book shows people in landscapes across a huge expanse in local reality and in external conceptions complete with their own agency ideas and lifestyles

The Wider Island of Pelops David Michael Smith, William G. Cavanagh, Angelos Papadopoulos, 2023-03-23 This volume explores the myriad ways in which pottery was created utilized and experienced in the prehistoric Aegean across a period of more than 4000 years between the Middle Neolithic and the Early Iron Age transition *Southern Europe?* Martin Baumeister, Roberto Sala, 2015-10-08 According to mainstream discourse of the Cold War post 1945 Western Europe was essentially a homogeneous historical space fully integrated into modern industrial society But as Southern Europe makes clear Western European societies were in fact divided by deep political and economic inequalities While nations in the north embodied consolidated democracies Spain Portugal and Greece were at times all authoritarian regimes Deeply afflicted with underdevelopment these countries were cut off from the economic miracles other Western European states were experiencing With its weak democracy Italy held a contradictory position between the struggles of the Iberian and Greek peninsulas and the progress of its neighbors beyond the Alps Now old inequalities long believed to be things of the past have

resurfaced and a new debt crisis appears to be splitting the continent apart along historic lines This book raises the important question of whether studying the geopolitics and social history of southern Europe might be a valuable analytical tool for understanding these contemporary financial catastrophes Empires of the Sea, 2019-10-07 Empires of the Sea brings together studies of maritime empires from the Bronze Age to the Eighteenth Century The volume aims to establish maritime empires as a category for the comparative study of premodern empires and from a partly non western perspective The book includes contributions on Mycenaean sea power Classical Athens the ancient Thebans Ptolemaic Egypt The Genoese Empire power networks of the Vikings the medieval Danish Empire the Baltic empire of Ancien R gime Sweden the early modern Indian Ocean the Melaka Empire the non European aspects of the Portuguese Empire and Dutch East India Company and the Pirates of Caribbean Multiple Mediterranean Realities Achim Lichtenberger, Constance von Rügen, 2015 **European Investment in Greece in the Nineteenth Century** Korinna Schönhärl, 2020-09-23 Banking historiography often does not sufficiently take into account bankers deliberations of their decision making but rather limits investigation to considerations of profit maximisation This book shows that the decision making processes of nineteenth century bankers contemplating high risk financial markets like Greece are just as complex as present day investment decisions The book now published in English after a first German edition offers in depth studies of decision making in concrete historical situations considering political and economic circumstances and also the individual background of the actors concerned including a reflection on the influence of cultural movements such as Philhellenism Employing methodological inspirations from the field of behavioural finance the book analyses a broad range of published and unpublished English French Greek German and Swiss sources on European investment in Greece between 1821 and the Balkan wars Additionally rich insights into Greek economic history the economic integration of the country into Europe and long lasting European stereotypes of Southern Europe and Greece are provided this furthers understanding of the historical background of the Greek financial crisis after 2009 In combining the perspectives of financial economic political and cultural history this book is primarily significant for students of various fields of historiography Due to its strong awareness of methodological questions it is also of great interest to academic historians In addition the strong public interest in the Greek financial crisis after 2009 and its consequences for Europe will thirdly attract the interest of a broader public The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 International license Les royaumes de Chypre à l'épreuve de l'histoire Anna Cannavò, Ludovic Thély, 2018 Dans le cadre du renouveau que connaissent les tudes sur Chypre l ge du Fer ce volume apporte une r flexion sur le th me des continuit s ruptures et changements qui accompagnent l histoire des royaumes chypriotes du Ier mill naire avant notre re On y examine les volutions politiques en insistant sur le passage d un mode de gouvernement un autre les transitions culturelles avec la cr ation de la koin pan chypriote d poque g om trique la

Of Odysseys and Oddities Barry Molloy, 2016-08-31 Of Odysseys and Oddities is about scales and modes of interaction in prehistory specifically between societies on both sides of the Aegean and with their nearest neighbors overland to the north and east The 17 contributions reflect on tensions at the core of how we consider interaction in archaeology particularly the motivations and mechanisms leading to social and material encounters or displacements Linked to this are the ways we conceptualize spatial and social entities in past societies scales and how we learn about who was actively engaged in interaction and how and why they were modes The papers provide a broad chronological spatial and material range but taken together they critically address many of the ways that scales and modes of interaction are considered in archaeological discourse Ultimately the intention is to foreground material culture analysis in the development of the arguments presented within this volume informed but not driven by theoretical positions

The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is an exceptional and thrilling novel that will keep you wondering until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
