Mega Projects The Changing Politics Of Urban Public Investment:

Mega-Projects Alan A. Altshuler, David E. Luberoff, 2004-05-13 A Brookings Institution Press and Lincoln Institute of Land Policy publication Since the demise of urban renewal in the early 1970s the politics of large scale public investment in and around major American cities has received little scholarly attention In **Mega Projects** Alan Altshuler and David Luberoff analyze the unprecedented wave of large scale mega public investments that occurred in American cities during the 1950s and 1960s the social upheavals they triggered which derailed large numbers of projects during the late 1960s and early 1970s and the political impulses that have shaped a new generation of urban mega projects in the decades since They also appraise the most important consequences of policy shifts over this half century and draw out common themes from the rich variety of programmatic and project developments that they chronicle The authors integrate narratives of national as well as state and local policymaking and of mobilization by mainly local project advocates with a profound examination of how well leading theories of urban politics explain the observed realities The specific cases they analyze include a wide mix of transportation and downtown revitalization projects drawn from numerous regions most notably Boston Denver Los Angeles New York City Chicago Atlanta Dallas Portland and Seattle While their original research focuses on highway airport and rail transit programs and projects they draw as well on the work of others to analyze the politics of public investment in urban renewal downtown retailing convention centers and professional sports facilities In comparing their findings with leading theories of urban and American politics Altshuler and Luberoff arrive at some surprising findings about which perform best and also reveal some important gaps in the literature as a whole In a concluding chapter they examine the potential effects of new fiscal pressures business mobilization to relax environmental constraints and security concerns in the wake of September 11 And they make clear their own views about how best to achieve a balance between developmental environmental and democratic values in public investment decisionmaking Integrating fifty years of urban development history with leading theories of urban and American politics **Mega Projects** provides significant new insights into urban and intergovernmental politics

Decision-making on Mega-projects Hugo Priemus, Bent Flyvbjerg, Bert van Wee, 2008-01-01 It will be useful for those experienced and senior professionals who are charged with authorizing and controlling projects Recommended P F Rad Choice Building on the seminal work of Bent Flyvbjerg this book is a collection of expert contributions that will prove essential to anyone wanting to understand why mega projects go wrong and how they can be made to work better Professor Sir Peter Hall University College London UK This book offers a refreshing and fascinating look at mega projects from the perspective of public evaluation and planning With the changing role of the public sector in planning and implementing large scale projects and a subsequent strong emergence of private public modes of operation mega projects have become a problematic phenomenon This volume is a major source of information and reference It provides the reader with unique insights and caveats in mega projects planning Peter Nijkamp VU University Amsterdam The

Netherlands This book enlarges the understanding of decision making on mega projects and suggest recommendations for a more effective efficient and democratic approach Authors from different scientific disciplines address various aspects of the decision making process such as management characteristics and cost benefit analysis planning and innovation and competition and institutions The subject matter is highly diverse but certain questions remain at the forefront For example how do we deal with protracted preparation processes how do we tackle risks and uncertainties and how can we best divide the risks and responsibilities among the private and public players throughout the different phases of the project Presenting a state of the art overview based on experiences and visions of authors from Europe and North America this unique book will be of interest to practitioners of large scale project management politicians public officials and private organisations involved in mega project decision making It will also appeal to researchers consultants and students dealing with substantial engineering projects complex systems project management and transport infrastructure *Urban Megaprojects* Gerardo del Cerro Santamaria,2013-06-06 This book discusses the economic and political conditions that facilitate megaproject implementation and what are the impacts on urbanity and livability of such costly mode of urban development It includes contributions from sociologists planners geographers and architects making it a truly multidisciplinary project *The Political Economy of Megaprojects in Asia* Hyun Bang Shin,Dong-Wan Gimm,2025-02-18 This book offers a comprehensive analysis of how the developmental goals of Asian states are reflected in large scale projects and how various actors both realize and challenge these goals The rise of Asian economies has spurred the proliferation of megaprojects through large scale resource mobilization necessitating varying degrees of state intervention Despite neoliberal pressures these projects remain linked to national developmental aspirations driven by domestic transnational or combined pro growth interests and serve multiple political purposes The book advances the argument that megaprojects embody the dynamics of multiscalar strategic relations that determine the process and outcome of urbanization These projects create iconic landmarks new towns central business districts and infrastructure showcasing intertwined political and economic interests By examining contemporary megaprojects in China South Korea Taiwan India Malaysia and Turkey the contributing authors reveal the complexity of urbanizing forces and their multiscalar nature in shaping the built environment and shed light on the intricate interplay of state strategies economic needs and sociopolitical forces that influence urban landscapes This interdisciplinary work provides a nuanced understanding of the political economy underpinning Asian urbanization and contributes to ongoing debates on urban development state society relations and the production of space in the context of globalization Chapter 1 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license *Contesting Megaprojects* Gerardo del Cerro Santamaria,2025-12-24 Megaprojects are not merely transformative but rather they are inherently disruptive They are incompatible with any approach to urban sustainability that prioritizes the well being of urbanites and the boundaries of the

Earth system In fact megaprojects undermine efforts to tackle the global impacts associated with both the destructive creation of capitalism and the new climate regime The reason for this state of affairs is not cost overruns and poor megaproject management but the disruptive impacts that megaprojects have on urban areas This book emphasizes the impacts imperative in megaproject planning the importance of identifying disruptive impacts as a prerequisite for critically assessing whether megaprojects should be built Drawing on 18 megaprojects in 16 cities around the world *inter alia* Istanbul Hong Kong Abu Dhabi Barcelona Boston New York and Shanghai *Contesting Megaprojects* illustrates urban regional trajectories over the past fifty years These trajectories show the coexistence of property development culture and iconic architecture together with a more recent interest in science and technology innovation and sustainability as strategies to foster urban competitiveness Megaprojects cause massive disruptions everywhere and the book offers a typology of megaproject impacts socioeconomic environmental spatial political and geopolitical financial cultural and systemic As a response to this emerging complex web of interrelated megaproject impacts disruptive complexity the book develops the concept of complex sustainability a transdisciplinary approach to urban sustainability through socioeconomic sustainability and deep sustainability The critical outlook of this book contributes to fundamental debates around capitalist development trickle down urbanism spectacularization high tech innovation and AI planetary boundaries global risks resilience the right to the city geopolitics democracy prosperity and power *Contesting Megaprojects* can help urban scholars and analysts practitioners policymakers and residents of cities better understand the complex impacts of urban megaprojects their magnitude and consequences and identify pathways of analysis and action toward a more sustainable and just future

Locating Right to the City in the Global South Tony Samara, Shenjing He, Guo Chen, 2013-01-04 Despite the fact that virtually all urban growth is occurring and will continue to occur in the cities of the Global South the conceptual tools used to study cities are distilled disproportionately from research on the highly developed cities of the Global North With urban inequality widely recognized as central to many of the most pressing challenges facing the world there is a need for a deeper understanding of cities of the South on their own terms *Locating Right to the City in the Global South* marks an innovative and far reaching effort to document and make sense of urban transformations across a range of cities as well as the conflicts and struggles for social justice these are generating The volume contains empirically rich theoretically informed case studies focused on the social spatial and political dimensions of urban inequality in the Global South Drawing from scholars with extensive fieldwork experience this volume covers sixteen cities in fourteen countries across a belt stretching from Latin America to Africa and the Middle East and into Asia Central to what binds these cities are deeply rooted complex and dynamic processes of social and spatial division that are being actively reproduced These cities are not so much fracturing as they are being divided by governance practices informed by local histories and political contestation and refracted through or infused by market based approaches to urban development Through a close examination of these practices and resistance to

them this volume provides perspectives on neoliberalism and right to the city that advance our understanding of urbanism in the Global South. In mapping the relationships between space politics and populations the volume draws attention to variations shaped by local circumstances while simultaneously elaborating a distinctive transnational Southern urbanism. It provides in-depth research on a range of practical and policy-oriented issues from housing and slum redevelopment to building democratic cities that include participation by lower-income and other marginal groups. It will be of interest to students and practitioners alike studying Urban Studies, Globalization and Development.

The Fate of Cities

Roger Biles, 2011. The first major comprehensive treatment of urban revitalization in 35 years. Examines the federal government's relationship with urban America from the Truman through the Clinton administrations. Provides a telling critique of how in the long run government turned a blind eye to the fate of cities.

Urban Restructuring and International Mega-events

Lucrezia Miranda, 2009. **Harvard Design Magazine**, 2005. The Oxford Handbook of Megaproject Management. Bent Flyvbjerg, 2017-06-01. The Oxford Handbook of Megaproject Management provides state-of-the-art scholarship in the emerging field of megaproject management. Megaprojects are large, complex projects which typically cost billions of dollars and impact millions of people like building a high-speed rail line, a megadam, a national health or pensions IT system, a new wide-body aircraft, or staging the Olympics. The book contains 25 chapters written especially for this volume, covering all aspects of megaproject management from front-end planning to actual project delivery, including how to deal with stakeholders, risk, finance, complexity, innovation, governance, ethics, project breakdowns, and scale itself. Individual chapters cover the history of the field and relevant theory from behavioral economics to lock-in and escalation to systems integration and theories of agency and power. All geographies are covered from the US to China, Europe to Africa, South America to Australia, as are a wide range of project types from hard infrastructure to soft-change projects. In-depth case studies illustrate salient points. The Handbook offers a rigorous, research-oriented, up-to-date academic view of the discipline based on high-quality data and strong theory. It will be an indispensable resource for students, academics, policy makers, and practitioners.

Mega-projects Alan A. Altshuler, David Luberoff, 2003. In comparing their findings with leading theories of urban and American politics, Altshuler and Luberoff arrive at some surprising findings about which perform best and also reveal some important gaps in the literature as a whole. In a concluding chapter, they examine the potential effects of new fiscal pressures, business mobilization to relax environmental constraints and security concerns in the wake of September 11. And they make clear their own views about how best to achieve a balance between developmental, environmental and democratic values in public investment decisionmaking.

BOOK JACKET Cities and Local Governments in Central Asia

Madina Junussova, 2020-02-28. This book presents the changing roles of urban governments and how local governments struggle to gain administrative, fiscal and political power to combat current urban challenges in Kazakhstan. Focusing on the cities and regions selected by the national government of Kazakhstan to be the drivers of national economic development, the author

analyses the impact of decentralization on the role of local governments The book examines the practical experiences of city and regional governments with an emphasis on urban planning public investment in national projects and management of urban transport Due to the complexity and irregular distribution of political reforms at different levels of local government in Kazakhstan three separate studies are presented each looking at a specific aspect of decentralization reform and local government function related to physical urban development and distribution of public investment The author argues that if the national government of Kazakhstan wants to concentrate economic resources in urban agglomerations it is not enough to assume that local governments are ready to play the role of efficient planners and managers of urban development A useful analysis illustrating cities and urban conglomerations as engines of growth in economic development this book will be of interest to academics studying Central Asian Studies in particular political and economic development Development Studies and Urban Studies The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license
