Schools of Business**

New Paths For Acceptance Opening Awareness In Interpersonal Acceptance Rejection:

New Paths for Acceptance Márcia Machado, Francisco Machado, 2015-07-31 *New Paths for Acceptance Opening Awareness in Interpersonal Acceptance Rejection* gathers global data from recent studies on interpersonal relationships. The book focuses specifically on the influence of perceived acceptance and rejection by significant others on children, adolescents, and adults' well-being and development. In doing this, it offers valuable insight for academics, researchers, practitioners, teachers, and service agencies to better understand the importance of including the issue of quality of interpersonal relationships in their research, teaching, and clinical practice. Based primarily on interpersonal acceptance rejection theory (IPARTheory), the book broadens and advances scientific knowledge about fundamental issues such as psychological adjustment, masculinity, school and academic-related issues, family functioning, parental alienation, intimate adult relationships, and other such topics. With contributions from researchers from three continents, the volume helps raise awareness about the crucial role that interpersonal acceptance plays across cultures on key issues such as these. The uncommon cultural diversity and multi-context nature of studies included in the book give readers the opportunity to learn about some of the most recent studies in this field and at the same time to have a privileged view of the broad scope and application of IPARTheory and research.

Mentalization in the Psychosis Continuum: Current Knowledge and New Directions for Research and Clinical Practice George Salaminios, Martin Debbané, Neus Barrantes-Vidal, Patrick Luyten, 2024-07-11 Impairments in mentalizing the capacity to utilize mental state information to understand oneself and others have consistently been identified across the developmental continuum of psychosis, expression from the premorbid and prodromal stages to its clinical forms. Mentalizing difficulties in psychosis have been investigated using an array of different methodologies, including novel experimental tasks, narrative assessments, self-report measures, as well as neuroscientific and computational methods. These studies have primarily examined how mentalizing disturbances relate to symptom dimensions and functional outcomes in clinical samples, as well as the transition to clinical psychosis among those who are at increased risk. More recently, clinical adaptations of mentalization-based treatments (MBT) and other psychotherapeutic approaches with a focus on supporting people suffering with psychosis reflect on their own and others' mental states such as Metacognitive Reflection and Insight Therapy (MERIT). These have been reported in the literature.

Current Research and Emerging Directions in Emotion-Cognition Interactions Florin Dolcos, Lihong Wang, Mara Mather, 2015-03-02 Emotion can impact various aspects of our cognition and behavior by enhancing or impairing them, e.g., enhanced attention to and memory for emotional events or increased distraction produced by goal-irrelevant emotional information. On the other hand, emotion processing is also susceptible to cognitive influences typically exerted in the form of cognitive control of emotion or emotion regulation. Despite important recent progress in understanding emotion-cognition interactions, a number of aspects remain unclear. The present book comprises a collection of manuscripts discussing emerging evidence regarding the mechanisms underlying emotion.

cognition interactions in healthy functioning and alterations associated with clinical conditions in which such interactions are dysfunctional Initiated with a more restricted focus targeting 1 identification and in depth analysis of the circumstances in which emotion enhances or impairs cognition and 2 identification of the role of individual differences in these effects our book has emerged into a comprehensive collection of outstanding contributions investigating emotion cognition interactions based on approaches spanning from behavioral and lesion to pharmacological and brain imaging and including empirical theoretical and review papers alike Co hosted by the Frontiers in Neuroscience Integrative Neuroscience and Frontiers in Psychology Emotion Science the contributions comprising our book and the associated research topic are grouped around the following seven main themes distributed across the two hosting journals I Emotion and Selectivity in Attention and Memory II The Impact of Emotional Distraction Linking Enhancing and Impairing Effects of Emotion III What Really is the Role of the Amygdala IV Age Differences in Emotion Processing The Role of Emotional Valence V Affective Face Processing Social Cognition and Personality Neuroscience VI Stress Mood Emotion and the Prefrontal Cortex The Role of Control in the Stress Response VII Emotion Cognition Interactions in Clinical Conditions As illustrated by the present collection of contributions emotion cognition interactions can be identified at different levels of processing from perception and attention to long term memory decision making processes and social cognition and behavior Notably these effects are subject to individual differences that may affect the way we perceive experience and remember emotional experiences or cope with emotionally challenging situations Moreover these opposing effects tend to co occur in affective disorders such as depression and PTSD where uncontrolled recollection of and rumination on distressing memories also lead to impaired cognition due to emotional distraction Understanding the nature and neural mechanisms of these effects is critical as their exacerbation and co occurrence in clinical conditions lead to devastating effects and debilitation Hence bringing together such diverse contributions has allowed not only an integrative understanding of the current extant evidence but also identification of emerging directions and concrete venues for future investigations

New Directions in Client-centered Therapy Joseph Truman Hart, Tommy M. Tomlinson, 1970 This book looks at the developing trends and theories of client centered therapy approach that were emerging in the 1960s and 1970s
