Oxford Textbook of Public Health Palliative Care Julian Abel, Allan Kellehear, 2022 Death, dying, loss and care giving are not just medical issues but societal ones. Movement, Knowledge, Emotion Jennifer Power, 2011-09-01 This book is about community activism around HIV/AIDS in Australia. It looks at the role that the gay community played in the social, medical and political response to the virus. Drawing conclusions about the cultural impact of social movements, the author argues that AIDS activism contributed to improving social attitudes towards gay men and lesbians in Australia while also challenging some entrenched cultural patterns of the Australian medical system, allowing greater scope for non-medical intervention into the domain of health and illness. The book documents an important chapter in the history of public health in Australia and explores how HIV/AIDS came to be a defining issue in the history of gay and lesbian rights in Australia. Stephenson,2016-06-28 This book concerns HIV prevention In it the authors argue that until the world focuses its attention on the social issues carried and revealed by AIDS it is unlikely that HIV transmission will be eradicated or even significantly reduced The book argues that we are currently witnessing the remedicalisation or the continuing biomedicalisation of HIV prevention which began in earnest after the development of successful HIV treatment and that this biomedical trajectory continues with the increasing push to use HIV treatments as prevention undermining what has been in many countries a successful prevention response This wide ranging study argues that HIV prevention involves enabling people and communities to discuss sex sexuality and drug use and informed by these discussion devising locally effective strategies for promoting safe sexual and drug injection practices
