New Tech New Ties How Mobile Communication Is Reshaping Social Cohesion:

New Tech, New Ties Richard Ling, 2010-09-24 How cell phones and mobile communication may in many cases strengthen social cohesion The message of this book is simple the mobile phone strengthens social bonds among family and friends With a traditional land line telephone we place calls to a location and ask hopefully if someone is there with a mobile phone we have instant and perpetual access to friends and family regardless of where they are But when we are engaged in these intimate conversations with absent friends what happens to our relationship with the people who are actually in the same room with us In *New Tech New Ties* Rich Ling examines how the mobile telephone affects both kinds of interactions those mediated by mobile communication and those that are face to face Ling finds that through the use of various social rituals the mobile telephone strengthens social ties within the circle of friends and family sometimes at the expense of interaction with those who are physically present and creates what he calls bounded solidarity Ling argues that mobile communication helps to engender and develop social cohesion within the family and the peer group Drawing on the work of Emile Durkheim Erving Goffman and Randall Collins Ling shows that ritual interaction is a catalyst for the development of social bonding From this perspective he examines how mobile communication affects face to face ritual situations and how ritual is used in interaction mediated by mobile communication He looks at the evidence including interviews and observations from around the world that documents the effect of mobile communication on social bonding and also examines some of the other possibly problematic issues raised by tighter social cohesion in small groups *Foundations of Mobile Media Studies* Jason

Taken for Grantedness Richard Ling, 2012-10-26 An examination of how the mobile phone has become part of the fabric of society as did such earlier technologies as the clock and the car Why do we feel insulted or exasperated when our friends and family don't answer their mobile phones If the Internet has allowed us to broaden our social world into a virtual friend net the mobile phone is an instrument of a more intimate social sphere The mobile phone provides a taken for granted link to the people to whom we are closest when we are without it social and domestic disarray may result In just a few years the mobile phone has become central to the functioning of society In this book Rich Ling explores the process by which the mobile phone has become embedded in society comparing it to earlier technologies that changed the character of our social interaction and along the way became taken for granted Ling drawing on research interviews and quantitative material shows how the mobile phone and the clock and the automobile before it can be regarded as a social mediation technology with a critical mass of users a supporting ideology changes in the social ecology and a web of mutual expectations regarding use By examining the similarities and synergies among these three technologies Ling sheds a more general light on how technical systems become embedded in society and how they support social interaction within the closest sphere of friends and family

The Reconstruction of Space and Time Rich Ling, Scott W. Campbell, 2011-12-31 One of the most significant and obvious examples of how mobile communication influences our understanding of time and space is how we coordinate with one another Mobile communication enables us to call specific individuals not general places Regardless of location we are able to make contact with almost anyone almost anywhere This advancement has changed and continues to change human interaction Now instead of agreeing on a particular time well beforehand we can iteratively work out the most convenient time and place to meet at the last possible moment on the way to the meeting or once we arrive at the destination In their early days mobile devices were primarily used for various types of emergency situations and for work In some cases the device was an essential element in various business operations or used so that overseas workers could communicate with their families The distance between a remote posting and the people back home was suddenly and dramatically reduced People began to share these devices not necessarily out of economic issues but also questions of family and interpersonal dynamics The process of sharing decisions as to who is a legitimate partner makes the nature of relationships more explicit By examining the economy of sharing we not only see how sharing mobile phones restructures social space but are also given insight into an individual's web of interactions This cutting edge book deals with
