**Landscape and Society in Dumnonia** Stephen Rippon, 2025-08-15 Explores South West England's development from the Iron Age through medieval times focusing on Ipplepen This book explores the distinctive landscape and society of South West England that had emerged by the Iron Age and which continued to develop during the Roman and medieval periods A focus of the research was the long term programme of survey and excavation on the Iron Age Roman and early medieval settlement at Dainton Elms Cross in

Ippelepen Devon which included the only Roman roadside settlement to have seen extensive excavation to the south and west of Exeter on the very edge of the Roman empire as well as a substantial early medieval cemetery First discovered through the reporting of an unusual concentration of Roman finds to the Portable Antiquities Scheme the site was investigated through a joint university and community project led by the University of Exeter in partnership with the British Museum PAS Devon County Council and Cotswold Archaeology What for the South West of England was exceptional preservation meant that large amounts of animal bone charred cereals and human remains were preserved alongside a regionally important material culture assemblage The site which had been occupied for c 1200 years was abandoned around the 8th century AD A programme of documentary place name and historic landscape research across a study area extending from the coast up onto Dartmoor explores the context of this major landscape change which appears to have been associated with the appearance of hamlets and open fields and the fragmentation of an early folk territory Together the excavations in Ippelepen and the wider contextual research reveal how communities living in South West England developed a distinctive identity that reflects a well developed understanding of their region s natural environment alongside a degree of ambivalence to outside cultural influences
