**Intelligent Environments 2009** Victor Callaghan, 2009 As computers are increasingly embedded into our everyday environments the objects therein become augmented with sensors processing and communication capabilities and novel interfaces The capability for objects to perceive the environment store and process data pursue goals reason about their intentions and coordinate actions in a holistic manner gives rise to the so called Intelligent Environment IE In such environments real space becomes augmented with digital content thus transcending the limits of nature and of human perception The result is a pervasive transparent infrastructure capable of recognizing responding and adapting to individuals in a seamless and unobtrusive way The realization of Intelligent Environments requires the convergence of different disciplines such as information and computer science building architecture material engineering artificial intelligence sociology art and design The 5th International Conference on Intelligent Environments IE 09 held at the Polytechnic University of Catalonia Castelldefels Barcelona Spain provides a multidisciplinary forum for researchers and engineers from across the world to present their latest research and to discuss

future directions in the area of Intelligent Environments The IE 09 proceedings contain the complete conference program including full papers presented at special sessions and short papers from the doctoral colloquium and poster session In addition three thought provoking invited lectures on topics of current and future IE research are included *The 2nd IET International Conference on Intelligent Environments* ,2006 Intelligent Systems Report ,1998 *Massively Parallel Artificial Intelligence* Hiroaki Kitano,James A. Hendler,1994 The increased sophistication and availability of massively parallel supercomputers has had two major impacts on research in artificial intelligence both of which are addressed in this collection of exciting new AI theories and experiments Massively parallel computers have been used to push forward research in traditional AI topics such as vision search and speech More important these machines allow AI to expand in exciting new ways by taking advantage of research in neuroscience and developing new models and paradigms among them associate memory neural networks genetic algorithms artificial life society of mind models and subsumption architectures A number of chapters show that massively parallel computing enables AI researchers to handle significantly larger amounts of data in real time which changes the way that AI systems can be built which in turn makes memory based reasoning and neural network based vision systems become practical Other chapters present the contrasting view that massively parallel computing provides a platform to model and build intelligent systems by simulating the massively parallel processes that occur in nature Proceedings of the ACM Workshop on Next-generation Residential Broadband Challenges ,2004
