**Nexus Network Journal** ,2010      **Mathematical Thinking and Properties in Architecture** Ju Hyun Lee,Michael J. Dawes,Michael J. Ostwald,2025-06-30 This monograph explores the profound connections between architecture and mathematics through the works of Andrea Palladio Le Corbusier and Peter Eisenman Combining historical insights with computational analyses it examines the social spatial and aesthetic properties of twenty six iconic designs Advanced methods such as Space Syntax isovists fractal analysis image segmentation and semantic linguistic analysis reveal the mathematical principles underlying architectural thinking and properties Richly illustrated with over 100 visuals this volume is an essential resource for senior undergraduates postgraduates practicing architects and historians seeking a deeper understanding of mathematical thinking in architectural design and analysis      **Mathematical Excursions to the World's Great Buildings** Alexander Hahn,2012-07-22 Describes the mathematics behind the design of famous buildings including the Parthenon the Sydney Opera House and the Bilbao Guggenheim      **Nexus Network Journal 12,1** Kim Williams,2010-11-16      **In the Shadow of the Prophet** Roy P. Mottahedeh,2023-01-19 In pieces drawn from over the course of his distinguished career pre eminent historian Roy Mottahedeh explores such diverse topics as the social bonds that connected people in the early Islamic Middle East the transmission of learning in the Muslim world religious and ethnic toleration in the past and in the present and the theme of wonders in The Thousand and One Nights His essays extend from the early Islamic period through the medieval era and on to modern times A number concern Iran the country of his father s birth and again Mottahedeh s studies range widely including Persian panegyric poetry the origins of the city of Kashan and Shi ite political thought Speaking to contemporary concerns he also touches upon voting rights academic freedom and censorship Intended not only for those in Islamic studies but for students of history and interested lay readers there are introductions to each section written with the non specialist in mind and these sections progress from more general topics to those more specialized In the Shadow of the Prophet thus reflects Mottahedeh s desire that the Islamic world and its history become better understood so that cooperation between Muslims and non Muslims might become the order of the day      Cities of Medieval Iran ,2020-06-11 Cities of Medieval Iran brings together studies in urban geography archaeology and history of medieval Iranian cities spanning the Islamic period until ca 1500 but also the pre Islamic situation The cities and their inhabitants take centre stage they are not just the places where something else happened Urban actors are given priority over external factors The contributions take a long term perspective and thus take the interaction between urban centres and their hinterland into account Many contributions come from history or archaeology but new disciplines are also methodologically integrated into the study of medieval cities such as the arts of the book lexicography geomorphology and digital instruments Contributors include Denise Aigle Mehrdad Amanat Jean Aubin Richard W Bulliet Jamsheed K Choksy David Durand Gu dy Etienne de la Vaissi re Majid Montazer Mahdi Roy P Mottahedeh J rgen Paul Rocco Rante Sarah Savant Ali Shojai Esfahani Donald

Whitcomb and Daniel Zakrzewski      **Nexus Network Journal 11,2** Kim Williams,2010-10-24 The title of this issue of the Nexus Network Journal Architecture Mathematics and Structure is deliberately ambiguous At first glance it might seem to indicate the relationship between what buildings look like and how they stand up This is indeed one aspect of what we are concerned with here But on a deeper level the fundamental concept of structure is what connects architecture to mathematics Both architecture and mathematics are highly structured formal systems expressed through a symbolic language For architecture the generating structure might be geometrical musical modular or fractal Once we understand the nature of the structure underlying the design we are able to read the meaning inherent in the architectural forms The papers in this issue all explore themes of structure in different ways      **Santo Antão** David Salomoni,Luana Giurgevich,Henrique Leitão,2025-06-12 The volume delves into the multifaceted history of Lisbon s Jesuit College of Santo Ant o tracing its evolution from its establishment to the eventual suppression of the Society of Jesus This scholarly work examines an array of themes including the college s innovative pedagogical practices its architectural developments and its significant contributions to the preservation of a rich literary heritage Moreover the volume situates the institution within broader social and scientific context      **Nexus Network Journal** ,2010      **Nexus Network Journal 8,2** ,2006-12-01 This book presents an exploration of the arch from the points of view of architecture mathematics engineering construction history and cultural symbolism Leonardo da Vinci described the arch as two weaknesses which leaning on each other become a strength a metaphor for the way that science and art lean on each other to strengthen our lives      **Nexus Network Journal 12,2** Kim Williams,2010-11-16      **Icons of Space** Jelena Bogdanović,2021-07-26 Icons of Space Advances in Hierotopy brings together important scholars of Byzantine religion art and architecture to honour the work of renowned art historian Alexei Lidov As well as his numerous publications Lidov is well known for developing the concept of hierotopy an innovative approach for studying the creation of sacred spaces Hierotopy and the related concepts of spatial icons and image paradigms emphasize fundamental questions about icons including what defines them as structures spaces and experiences Chapters in this volume engage with the overarching theme of icons of space by employing contrasting and complementing methods of hierotopy with more traditional approaches such as iconography Examinations of icons have traditionally been positioned within strictly historical theological socio economic political and art history domains but this volume poses epistemological questions about the creation of sacred spaces that are instead inclusive of multi layered iconic ideas and the lived experiences of the creators and beholders of such spaces This book contributes to image theory and theories of architecture and sacred space Simultaneously it moves beyond colonial studies that predominantly focus on questions of religion and politics as expressions of privileged knowledge and power This book will appeal to scholars and students of Byzantine history as well as those interested in hierotopy and art history      **Nexus Network Journal 13,3** Kim Williams,2012-03-14 The Autumn 2011 vol 13 no 3 issue of the Nexus Network Journal features nine papers guest edited by Jos Calvo Lopez dedicated

to the theme From Mediaeval Stonecutting to Projective Geometry This is an outgrowth of the session by the same name which took place during the eighth international interdisciplinary conference Nexus 2010 Relationships between Architecture and Mathematics held in Porto Portugal in June 2010 The topics discussed range from the theoretical mathematics to built examples both historical and contemporary The issue is completed with other research papers conference reports and book reviews Mathematical Reviews ,2000 **Nexus Network Journal 13,2** Kim Williams,2011-08-12 The Summer 2011 vol 13 no 2 issue of the Nexus Network Journal features eight papers that resulted from the eighth international interdisciplinary conference entitled Nexus 2010 Relationships between Architecture and Mathematics held in Porto Portugal in June 2010 This is the second issue of this volume that contains papers presented at the conference In the spirit of interdisciplinarity that characterises the NNJ the presentations range in time from the historical to the contemporary in scale from the level of the individual building to urban design in subject matter from pure architectural theory to building practice and in themes from geometry and perspective to music The aim of the NNJ is to provide a wide panorama of the relationships that exist between the disciplines of architecture and mathematics and this issue captures those relationships in all their richness and variety **Nexus Network Journal** ,1999 Architecture as Communication Ross Eaman,2025-04-08 Media theory has long overlooked the built environment and its communicative capacity how built structures and spaces convey meaning through material embodiment and symbolization Architecture as Communication advances the idea that built environments function as media of communication Using practice theory in conjunction with the concept of style this book is anchored in three historical determinants the quest for perfect proportion in buildings the belief in architectural determinism and the ongoing efforts within other media to influence how those who experience built environments understand them Ross Eaman explores how houses schools places of worship factories office buildings stores malls opera houses plazas and parks have meaning for people as subjective life worlds Architecture as Communication proposes media theory that articulates the social construction of meaning as a unique way of understanding the built environment one in which the users and observers of structures and spaces participate along with architects and designers Architecture according to Eaman encompasses the multiplicity of communication as human interaction preparing people for what they are about to encounter signalling how they should act and selectively enabling them to perform their expected role Using examples across many historical periods and cultures Architecture as Communication argues that we judge our built environments by the values they communicate Nexus Network Journal 12,3 Kim Williams,2011-02-19 We grasp and transform the world through interplays of quantification and qualification The cross pollination of geometric and literary figures is deeply embedded in our cognitive habits instruments of inquiry and the constructed environment Through time thought has reflected on the visible processes and products of material craft to explain and train the invisible workings of the mind Recursively material craft embodies a tradition of splitting ideas into categorical parts and compositional units
