## Intelligent Addressable Fire Alarm System

### General

The NFS-320 Intelligent Fire Alarm Control Panel is part of the ONYX Series of Fire Alarm Controls from NOTIFIER.

In stand-alone or network configurations, ONYX Series products meet virtually every application requirement.

The NFS-320's modular design makes system planning easier. The panel can be configured with just a few devices for small building applications, or networked with many devices to protect a large campus or a high-rise office block. Simply add additional peripheral equipment to suit the application.

For installations using NFS-320C, an optional ACM Series communicator can be mounted in the same cabinet (up to 48 zones/points, order separately; see DN-60085).

The FireWatch Series intelligent monitoring modules (IPDACT-2 and IPDACT-2UD) permit monitoring of alarm signals over the Internet, saving the monthly cost of two dedicated business telephone lines. Although not required, the secondary telephone line may be retained providing backup communication over the public switched telephone line.

**NOTE:** Unless called out with a vendor-specific "RT", "TC" or "ET" at the end of the part number, "NFS-320" refers to models NFS-320, NFS-320R, NFS-320C, and NFS-320E.
