

NFW-100X Intelligent Addressable FACP with Communicator

General

The FireWanderer-100X (NFW-100X) is the latest intelligent addressable Fire Alarm Control Panel (FACP) within the FireWanderer Series and is a direct replacement for the FireWanderer-100 (NFW-100). The NFW-100X comes with a pre-installed communicator and supports up to 1000 addressable devices (999 detectors and 999 modules). With an extensive list of powerful features, the NFW-100X programs just like FireWanderer-100 products, yet fits into applications previously served only by conventional panels.

The pre-installed IPOTIS-COM is a dual technology (POTS and IP) communicator. The POTS transmits system status (alarms, trouble, MAC lists, etc.) to a Central Station via the public switched telephone network. The IP communicator's internet monitoring capability sends alarm signals over the Internet, saving the monthly cost of two dedicated business telephone lines. Although not required, the secondary telephone line may be retained providing backup communication over the public switched telephone line. Optional cellular reporting is available using the CELL-MOD or CELL-CAB-4.

Program and local programming of the control panel is possible using the FS-Tools Upload/Download utility. Programming databases can be uploaded/downloaded via the panel's USB port (and U200 cable) or via an optional communicator using the IPOTIS-COM communicator. The USB port also allows for the download or upload of the entire programs, history file, peak-test data, current status and system voltages by means of a USB flash drive.

The power supply and all electronics are contained on a circuit board supported on a new quick install chassis and housed in a metal cabinet. Available accessories include local and remote up/download software, remote annunciators, and reverse polarity/duplex transmitter (RPTM).
