**A Relational Approach to NGOs in Global Politics**, 2025-05-22 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. How do non-governmental organizations (NGOs) create the spaces in which they act despite all the odds that are stacked against them? How do NGOs meet the requirements of the moment often being in the right place at the right time? Why is the sum of NGO activity frequently greater than the parts? To answer these questions, *A Relational Approach to NGOs in Global Politics* analyses the ways in which NGOs relate to each other as well as with states, intergovernmental organizations, businesses, and other actors. It considers NGOs as living organizations: flexible, adaptive, creative. To examine the various NGO relationships and how they are built to surmount challenges, manage complexity, and make progress. In doing so, it sheds light on their power and agency in global politics. Maryam Zarnegar Deloffre and Sigrid Quack develop core conceptual building blocks such as NGOing and typologies of social interactions and relational power, which are explored in empirical studies of NGOs on a range of topics. These include legal, environmental, conflicts, humanitarian assistance, and counterterrorism, as well as analyses of relational forms such as super networks, meta associations, and mergers and acquisitions. With a broad conceptualization of NGO relationships and in-depth analysis of the forms and processes of NGO interactions, this volume expands the understanding of NGOing, promotes synthetic knowledge about the power and effects of NGO interactions, and reveals new perspectives on processes of global governing.

**NGOs in International Politics** Shamima Ahmed, David M. Potter, 2006. Non-governmental organizations have gained a great deal of popularity in recent years. The awarding of the Nobel Prize to The International Campaign to Ban Landmines in 1997 and to Médecins Sans Frontières in 1999 has highlighted the emergence of these organizations as new forces in international politics. Yet there is no work to date that has provided an overview of the varieties of interaction between NGOs and states, international organizations, and in international politics. This is especially true of books aimed at undergraduates. *NGOs in International Politics* surveys a range of NGO activities and relationships in a manner accessible to students in the classroom. Despite the gap in the textbook literature, non-governmental organizations are being taught in undergraduate courses either in theoretical terms or as components of service learning. This book is designed to remedy the gap between interest in NGOs and accessible literature for use in the classroom.

*Non-Governmental Organizations in World Politics* Peter Willetts, 2010-12-15. Non-governmental organizations (NGOs) from Amnesty International and Oxfam to Greenpeace and Save the Children are now key players in global politics. This accessible and informative textbook provides a comprehensive overview of the significant role and increasing participation of NGOs in world politics. Peter Willetts examines the variety of different NGOs, their structure, membership, and activities, and their complex relationship with social movements and civil society. He makes us aware that there are many more NGOs exercising influence in the United Nations system than the few

famous ones Conventional thinking is challenged in a radical manner on four questions the extent of the engagement of NGOs in global policy making the status of NGOs within international law the role of NGOs as crucial pioneers in the creation of the Internet and the need to integrate NGOs within mainstream international relations theory This is the definitive guide to this crucial area within international politics and should be required reading for students NGO activists and policy makers

**Environmental NGOs in World Politics** Matthias Finger, Thomas Princen, 2013-01-11 At a time when states are reactive at best to the global ecological crisis and when economic globalization seems to be significantly contributing to the acceleration of that crisis environmental non governmental organisations NGOs are proliferating This book explains the key role of NGOs in an emerging world environmental politics showing how NGOs act both as independent bargainers and as agents of social learning to link biophysical conditions to the political realm at both the local and global levels Through the use of case studies the authors reveal the richness and diversity of NGO activity and the difficulty of the choices facing decision makers in their attempts to protect the environment seek new forms of governance and foster social environmental learning The book generates questions that are central not only to an understanding of NGO relations but to the study of international environmental politics Environmental NGOs in World Politics will be of great interest to upper level student and scholars of both environmental politics and international relations It will also appeal to environmental policy professionals

**The NGO Challenge for International Relations Theory** William E. DeMars, Dennis Dijkzeul, 2015-02-11 It has become commonplace to observe the growing pervasiveness and impact of Non Governmental Organizations NGOs And yet the three central approaches in International Relations IR theory Liberalism Realism and Constructivism overlook or ignore the importance of NGOs both theoretically and politically Offering a timely reappraisal of NGOs and a parallel reappraisal of theory in IR the academic discipline entrusted with revealing and explaining world politics this book uses practice theory global governance and new institutionalism to theorize NGO accountability and analyze the history of NGOs This study uses evidence from empirical data from Europe Africa Latin America the Middle East and Asia and from studies that range across the issue areas of peacebuilding ethnic reconciliation and labor rights to show IR theory has often prejudged and misread the agency of NGOs Drawing together a group of leading international relations theorists this book explores the frontiers of new research on the role of such forces in world politics and is required reading for students NGO activists and policy makers

**Routledge Handbook of NGOs and International Relations** Thomas Davies, 2019-04-09 Offering insights from pioneering new perspectives in addition to well established traditions of research this Handbook considers the activities not only of advocacy groups in the environmental feminist human rights humanitarian and peace sectors but also the array of religious professional and business associations that make up the wider non governmental organization NGO community Including perspectives from multiple world regions the book takes account of institutions in the Global South alongside better known structures of the Global North International contributors from a range of disciplines

cover all the major aspects of research into NGOs in International Relations to present a comprehensive overview of the historical evolution of NGOs the range of structural forms and international networks coverage of major theoretical perspectives illustrations of how NGOs are influential in every prominent issue area of contemporary International Relations evaluation of the significant regional variations among NGOs and how regional contexts influence the nature and impact of NGOs analysis of the ways NGOs address authoritarianism terrorism and challenges to democracy and how NGOs handle concerns surrounding their own legitimacy and accountability Exploring contrasting theories regional dimensions and a wide range of contemporary challenges facing NGOs this Handbook will be essential reading for students scholars and practitioners alike

**Religious NGOs in International Relations** Karsten Lehmann, 2016-01-29 Over the last 30 years non governmental organizations NGOs have become increasingly present in international discourses and active in international decision making Among the estimated several million NGOs in existence today an increasingly visible number of organizations are defining themselves in religious terms referring to themselves as religious spiritual or faith based NGOs This book documents the initial encounters between the particularly international segment of those organizations and the UN while at the same time covering the Protestant and Catholic spectrum that dominated the early years of their activities in the UN context This book focuses on the construction of the human rights discourse inside two religiously affiliated organizations The Commissions of the Churches on International Affairs CCIA and Pax Romana IMCS ICMICA These organizations have been formally accredited as NGOs by the UN label themselves as religious and look back upon a long and intense cooperation with the UN Lehmann presents material from the archives of those two organizations that has so far rarely been used for academic analysis In doing so as well as documenting the encounters between those organizations and the UN and looking at the Protestant and Catholic spectrum the book provides new insights into the very construction of the notions of the religious and the secular inside those organizations This work will be of great interest to all students of religion and international relations and will also be of interest to those studying related subjects such as global institutions comparative politics and international politics

**Non-state Actors in International Relations** Bas Arts, Math Noortmann, Bob Reinalda, 2001 Assessing the influence of non governmental organizations on international and transnational politics as well as examining the importance of non state actors in a world of nation states this theoretically rich text also discusses approaches that deal with the interplay between domestic and international politics Thorough and insightful this text draws on perspectives and theories from political science policy studies and international law Using topical and original case studies which cover the fields of security trade social clauses environment development aid civil rights and crime this volume constitutes one of the first vigorous theoretical analyses of this important contemporary phenomenon

**NGO Involvement in International Governance and Policy** Anton Vedder, 2007-11-30 Internationally operating nongovernmental organisations NGOs are increasingly involved in international politics and policy making In many respects their involvement resembles activities and

policies that until recently were typical of traditional national authorities This book is about the reasons for which NGOs can and the reasons for which NGOs cannot be considered as rightful participants in international governance It tries to deliver rationally defensible starting points for the discussion and the assessment of claims for the legitimacy of their organizations and activities The book focuses on the question What conditions must ideally be met for an organization to be called truthfully legitimate be it or be it not as a matter of fact perceived as legitimate by the public This does not mean that empirically descriptive questions are left aside Practical feasibility is important even to a thoroughly normative conception of legitimacy For that reason and for heuristic purposes large parts of this book are dedicated to the ways in which NGOs and stakeholders perceive NGO legitimacy

**NGOs and Transnational Networks** William E. DeMars, 2005-04-20 Non Governmental Organisations and their networks are proliferating in all regions of the world They address every transnational issue from population to peace human rights to species rights genocide to AIDS Supporters claim NGOs are effective in achieving their goals while detractors counter that NGO power is paltry compared to governments and corporations Challenging both views DeMars irreverently reveals the political claims implicit in every transnational NGO They are best conceptualised he argues not in terms of either principles or power but through the partners they make in transnational society and politics NGOs and transnational networks institutionalise conflict as much as cooperation and reshape states and societies often inadvertently NGOs have overthrown dictators provided life support for collapsed states and reengineered the family Their historical origins contrast sharply with current realities and show signs of radical change in the future

**NGOs in China's Foreign Policy** Anja Ketels, 2023-07-31 In recent years China has not only expanded its economic presence worldwide but has also actively pursued initiatives to enhance its global leadership promote international cooperation and provide humanitarian aid Concurrently Chinese NGOs have played an increasingly active role in China's international diplomacy initiating projects overseas and establishing offices in Belt and Road Initiative countries This book delves into this trend by examining China's global strategy the role of NGOs and exploring the perspectives of these organizations themselves on their functions and roles in international politics It presents a typology of NGOs within China's foreign policy summarizing the diverse factors that influence their multifaceted involvement The book reveals the divergence between Chinese and Western understandings of global governance and highlights the significance of the international engagement of Chinese NGOs as a new and noteworthy phenomenon in the fields of international relations and global governance

Religious Voices in the Politics of International Development Paul J. Nelson, 2021-04-15 This first study of faith based development NGOs FBOs political roles focuses on how U S FBOs in international development educate and mobilize their constituencies Most pursue cautious reformist agendas but FBOs have sometimes played important roles in social movements Nelson unpacks those political roles by examining the prominence of advocacy in the organizations the issues they address and avoid their transnational relationships and their relationships with religious and secular social movements

The agencies that educate and mobilize U S constituencies most actively are associated with small Christian sects or with non Christian minority faiths with historic commitments to activism or service Specialized advocacy NGOs play important roles and emerging movements on immigration and climate may represent fresh political energy The book examines faith based responses to the crises of climate change COVID 19 and racial injustice and argues that these will shape the future of religion as a moral and political force in America and of NGOs in international development

*Politics In Contemporary China* Yuyan Zhang, 2020-07-14 China's guiding principle for foreign relations and its focus on states and regions has shifted a lot from the first 30 years of the founding of the People's Republic of China PRC in 1949 to 1978 and beyond after reform and opening up. However, PRC's diplomatic practice has been continuous whether it was participation in the Korean War, breaking up with the former Soviet Union after a honeymoon period, China's self-defense war over Sino-Indian border, participation in the Vietnam War, breakthrough in the Sino-US relation, or PRC's self-defense war over the Sino-Vietnamese border. These historical events brought the need for theoretical study in International Politics (IP). The development of China's IP research was slow and filled with complications but it signified a breakthrough from scratch. This book has filled a gap by depicting a complete scroll of China's IP research in over 60 years since 1949. This book has followed two principles: one is according to the classification of the IP discipline and the other is to recommend adaptations according to China's actual conditions.

**International Humanitarian NGOs and State Relations** Andrew J. Cunningham, 2018-05-23 International Humanitarian NGOs and State Relations: Politics, Principles, and Identity examines the often discordant relationship between states and international non-governmental organisations working in the humanitarian sector. INGOs aiming to provide assistance to populations suffering from the consequences of conflicts and other human-made disasters work in the midst of very politically sensitive local dynamics. The involvement of these non-political international actors can be seen as a threat to states that see civil war as a state of exception where it is the government's prerogative to act outside normal legal or moral boundaries. Drawing on first-hand experience of humanitarian operations in contexts of civil war, this book explores how the relationship works in practice and how often clashing priorities can be mediated. Using case studies of civil conflicts in Sri Lanka, Darfur, Ethiopia, and Chechnya, this practice-based book brings together key issues of politics, principles, and identity to build a negotiation structure for analysing and understanding the relationship. The book goes on to outline a research and policy development agenda for INGOs to better adapt politically to working with states. International Humanitarian NGOs and State Relations will be a key resource for professionals and policy makers working within international humanitarian and development operations as well as for academics and students within humanitarian and development studies who want to understand the relationship between states and humanitarian and multi-mandate organisations.

**Private Organisations in Global Politics** Karsten Ronit, Volker Schneider, 2000 This study brings together a broad range of empirical case studies on topics of interest such as environmental movements, human rights organizations, and the international women's movement.
