## Nice Infinity Beckoned Adventuring Through 19691989:

**Island of Clouds** Gerald Brennan,2017-05-08 April 1972 Three legendary astronauts embark on mankind's boldest space voyage yet a yearlong mission to fly past our nearest planetary neighbor Venus What follows will be a journey more harrowing than any of them can imagine Island of Clouds the first full length novel in the Altered Space series is a gripping space epic based on NASA mission proposals from the late 1960s Touching on literary influences ranging from Borges and Bukowski to the Book of Job this story of exploration also offers a literary probing of the dark reaches of human nature alcoholism capitalism authority fatherhood and the ephemeral nature of desire The titles in the Altered Space series are wholly separate narratives but all deal with the mysteries of space and time progress and circularity Each one is an ens of words in which orbits of spacecraft moons planets and people allow us fresh perspectives on the cycles of our own lives

**The Sirens of Mars** Sarah Stewart Johnson,2020-07-16 As a new wave of interplanetary exploration unfolds a talented young planetary scientist charts our centuries old obsession with Mars Beautifully written emotive a love letter to a planet DERMOT O LEARY BBC Radio 2 Mars bewilderingly empty coated in red dust is an unlikely place to pin our hopes of finding life elsewhere And yet right now multiple spacecraft are circling sweeping over Terra Sabaea Syrtis Major the dunes of Elysium and Mare Sirenum on the brink perhaps of a discovery that would inspire humankind as much as any in our history With poetic precision and grace Sarah Stewart Johnson traces the evocative history of our explorations of Mars She interlaces her personal journey as a scientist with tales of other seekers from Galileo to William Herschel to Carl Sagan who have scoured this enigmatic planet for signs of life and transformed it in our understanding from a distant point of light into a complex world Ultimately she shows how its story is also a story about Earth it is a foil a mirror a tell tale reflection of our own anxieties and yearnings to find if we're lucky that we're not alone Elegantly written and boundlessly entertaining Sunday Telegraph Beguiling The Times Johnson's prose swirls with lyrical wonder as varied and multi hued as the apricot deserts butterscotch skies and blue sunsets of Mars Anthony Doerr New York Times Book Review Elegantly crafted Lord Martin Rees Astronomer Royal

**Into the Void** John Youskauskas,Melvin Croft,2025-05 The world had been fascinated with astronauts and spaceflight since well before the first crewed launches in 1961 when Yuri Gagarin Alan Shepard and John Glenn became household names But when Alexei Leonov of the Soviet Union exited his spacecraft in March of 1965 a new era in spaceflight began And when Ed White clad in his gleaming space suit with a large American flag on his left shoulder eased himself outside his Gemini spacecraft later that year Americans too had a new space hero They also learned a new acronym EVA short for extravehicular activity more commonly known as spacewalking Though few understood the tremendous risks White was taking in his twenty two minute space walk Americans watched with immense pride and patriotism as White tethered to Gemini 4 propelled himself around the spacecraft with a pressurized oxygen fueled zip gun But White's struggle to fit his space suited body back inside the claustrophobic Gemini spacecraft and close the hatch confirmed what NASA should have

known spacewalking wasn't easy. More than fifty years and hundreds of space walks later the art of EVA has evolved. The first space walks preparation for walking on the moon intended to prove that humans could function in raw space inside their own miniature spacecraft a space suit. After the end of the lunar program both the Americans and Soviets turned their focus to long duration flights on space stations in low Earth orbit and space walks were crucial to the success of these missions. The construction of the International Space Station the most sophisticated spacecraft to date required hundreds of hours of work by spacewalkers from many countries. In *Into the Void* John Youskauskas and Melvin Croft tell the unique story of those who have ventured outside the spacecraft into the unforgiving vacuum of space as we set our sights on the moon Mars and beyond.

**Infinity Beckoned** Jay Gallentine, 2016 *Infinity Beckoned* illuminates a critical period of space history when humans dared an expansive leap into the inner solar system. With an irreverent and engaging style Jay Gallentine conveys the trials and triumphs of the people on the ground who conceived and engineered the missions that put robotic spacecraft on the heavenly bodies nearest our own. These dedicated space pioneers include such individuals as Soviet Russia's director of planetary missions who hated his job but kept at it for fifteen years enduring a paranoid bureaucracy where even the copy machines were strictly regulated. Based on numerous interviews Gallentine delivers a rich variety of stories involving the men and women American and Russian responsible for such groundbreaking endeavors as the Mars Viking missions of the 1970s and the Soviet Venera flights to Venus in the 1980s. From the dreamers responsible for the Venus landing who discovered that dropping down through heavy clouds of sulfuric acid and 900 degree heat was best accomplished by surfing to the five man teams puppeteering the Soviet moon rovers from a top secret off the map town without a name the people who come to life in these pages persevered in often trying thankless circumstances. Their legacy is our better understanding of our own planet and our place in the cosmos.
