Nice Positive Realism Maurizio Ferraris:

Positive Realism Maurizio Ferraris, 2015-12-11 Positive Realism could be seen as the sequel to Maurizio Ferraris Manifesto of New Realism and Introduction to New Realism. The focus here is the other side of unamendability a notion described in his previous books according to which reality is unamendable it cannot be corrected at will. This resistance of the real is what ultimately tells us that in opposition to the claims of post Kantian philosophy the world is not a result of our conceptual work if it were so our power over reality would be much greater. Now the often disappointing limits that the real sets against our expectations are also a resource and this is the key point of the present book. Things exist and therefore undoubtedly resist us but in doing so they offer affordances resources opportunities. And that the greatest opportunity which underlies all the other ones is the fact that we share a world that is far from liquid on the contrary it provides the solid ground on which everything rests starting from our happiness or unhappiness. *Introduction to New Realism* Maurizio Ferraris, 2014-12-18 Introduction to New Realism provides an overview of the movement of contemporary thought named New Realism by its creator and most celebrated practitioner Maurizio Ferraris. Sharing significant concerns and features with Speculative Realism and Object Oriented Ontology New Realism can be said to be one of the most prescient philosophical positions today. Its desire to overcome the postmodern antirealism of Kantian origin and to reassert the importance of truth and objectivity in the name of a new Enlightenment has had an enormous resonance both in Europe and in the US. Introduction to New Realism is the first volume dedicated to exposing this continental movement to an anglophone audience. Featuring a foreword by the eminent contemporary philosopher and leading exponent of Speculative Realism Iain Hamilton Grant the book begins by tracing the genesis of New Realism and outlining its central theoretical tenets before opening onto three distinct sections. The first Negativity is a critique of the postmodern idea that the world is constructed by our conceptual schemas all the more so as we have entered the age of digitality and virtuality. The second thesis positivity proposes the fundamental ontological assertion of New Realism namely that not only are there parts of reality that are independent of thought but these parts are also able to act causally over thought and the human world. The third thesis normativity applies New Realism to the sphere of the social world. Finally an afterword written by two young scholars explains in more detail the relationship between New Realism and other forms of contemporary realism.

Dynamic Realism Tina Rock, 2021-10-05 Philosophy has traditionally considered reality as a set of static objects. Tina Rock transcends this understanding to explore the realistic potential of relational and dynamic ontology. These explorations are both complex and problematic as we attempt to reconceptualise being truth and knowledge as processual. To navigate this thinking Rock takes a new phenomenological path into a realism that discloses the world as temporal and relational without dismissing the epistemological difficulties surrounding genuine change. A fundamental challenge to outdated ways of thinking in our rapid interconnected world this book provides a provocative and contemporary understanding of our temporal reality.

The

Bloomsbury Italian Philosophy Reader Michael Lewis, David Rose, 2022-06-02 Italian philosophy constitutes one of the most vibrant and fruitful areas in contemporary thought bringing extraordinary novelty to some of the oldest tropes from human nature to the relation between political power and life the thinking of actuality and potential and the nature of work and labour This reader includes texts by the most renowned thinkers from Dante and Machiavelli to Giorgio Agamben Antonio Negri and Roberto Esposito all of which are introduced by an expert on the particular thinker and situated within the context of their work as a whole The Bloomsbury Italian Philosophy Reader provides a unique resource for students and scholars alike covering the history of Italian thought to the present day

Hysteresis Maurizio Ferraris, 2024-01-31 One of Europe's leading realist philosophers restores the role of the external world to modern philosophy Since the 1780s Western philosophy has been largely under the spell of Immanuel Kant's transcendental philosophy In this book Maurizio Ferraris offers a number of important criticisms of Kant anticipating the related critiques made by the Speculative Realists The first part originally published in 2001 lays the foundations of Ferraris New Realism anticipating the realist turn characteristic of 21st century philosophy The second written in 2021 outlines a complete metaphysical theory of realism based on the notion of hysteresis the ability of effects to survive even when their causes have ceased to exist Maurizio Ferraris is Full Professor of Theoretical Philosophy at the University of Turin and is the President of Labont Center for Ontology Sarah De Sanctis is an academic translator specialising in philosophy

New Realism and Contemporary Philosophy Gregor Kroupa, Jure Simoniti, 2022-05-19 This open access book advances the current debate in continental realism In the field of contemporary continental ontology Speculative Realist thinkers are now grappling with the genealogy of their ideas in the history of modern philosophy The Speculative Realism movement prompted a debate criticizing the predominant postmodernist orientation in philosophy which located its origins in Kantian correlationism which supposedly ended the period of early modern naive realist metaphysics by showing that the mind and the outside world can only ever be understood as correlates The debate over a new kind of realism has attracted many supporters and critics In order to refocus its specific interpretation of modern philosophy in general and of the Kantian gesture in particular this volume brings together major authors working on contemporary ontology and historians of ideas It underlines and illustrates the fact that contemporary continental philosophy is rediscovering its past in original ways by productively reinterpreting some of the key concepts of modern philosophy The perspectives and accounts of the key concepts of the history of philosophy are different in the views of individual contributors and sometimes radically so yet the discussion between contemporary realists and their critics shows that the real battleground of new ideas lies not in developing the philosophical motifs of the end of the 20th century but rather in rethinking the milestones of modern philosophy The eBook editions of this book are available open access under a CC BY NC ND 3.0 licence on bloomsburycollections.com
