**Planning Futures** Philip Allmendinger, Mark Tewdwr-Jones, 2005-06-29 Planning theory is currently in a confused state as a consequence of a number of changes over the last ten years in planning practice and social and economic theory Even prior to these events planning theory was an uncertain discipline reflecting planning's precarious position between and resting upon a range of professional subject areas and philosophical roots Planning Futures is an attempt to pin down the constantly evolving landscape of planning theory and to chart a path through this fast changing field Planning Futures is an up to date reader on planning theory but adds something more to the subject area than a mere textbook The contributors have attempted to bridge theory and practice while putting forward new theoretical ideas By drawing upon examples from planning practice and case study scenarios the authors ensure that the work discusses planning theory within the context of present planning practice Case studies are drawn from an international arena from the UK Europe South Africa and Australia

**On Translation** Paul Ricoeur, 2007-01-24 Paul Ricoeur was one of the most important philosophers of the twentieth century In this short and accessible book he turns to a topic at the heart of much of his work What is translation and why is it so important Reminding us that The Bible the Koran the Torah and the works of the great philosophers are often only ever read in translation Ricoeur reminds us that translation not only spreads knowledge but can change its very meaning In spite of these risk he argues that in a climate of ethnic and religious conflict the art and ethics of translation are invaluable Drawing on interesting examples such as the translation of early Greek philosophy during the Renaissance the poetry of Paul Celan and the work of Hannah Arendt he reflects not only on the challenges of translating one language into another but how one community speaks to another Throughout Ricoeur shows how to move through life is to navigate a world that requires translation itself Paul Ricoeur died in 2005 He was one of the great contemporary French philosophers and a leading figure in hermeneutics psychoanalytic thought literary theory and religion His many books include Freud and Philosophy and Time and Narrative
