*On Teaching and Learning* Jane Vella, 2007-11-02 *On Teaching and Learning* takes the ideas explored in renowned educator Jane Vella's best selling book *Learning to Listen Learning to Teach* to the next level and explores how dialogue education has been applied in educational settings around the world. Throughout the book she shows how to put the principles and practices of dialogue education into action and uses illustrative stories and examples from her extensive travels. Dialogue education values inquiry, integrity, and commitment to equity values that are also central to democracy. Learners are treated as beings worthy of respect, recognized for the knowledge and experience they bring to the learning experience. Dialogue education emphasizes the importance of safety and belonging. It is an approach that welcomes one's certainties and one's questions.

[Education in a Changing Environment: Conference Book, Volume 4](#) Eamon

O'Doherty, 2008 [Rethinking Field Experiences in Preservice Teacher Preparation](#) Etta R. Hollins, 2015-03-12 The focus of this book is the centrality of clinical experiences in preparing teachers to work with students from diverse cultural, economic, and experiential backgrounds. Organized around three themes learning, teaching through the approximation and representation of practice, learning, teaching situated in context and assessing and improving teacher preparation. *Rethinking Field Experiences in Preservice Teacher Preparation* provides detailed descriptions of theoretically grounded research based practices in programs that prepare preservice teachers to contextualize teaching practices in ways that result in a positive impact on learning for traditionally underserved students. These practices serve current demands for teacher accountability for student learning outcomes and model good practice for engaging teacher educators in meaningful productive dialogue and analysis geared to developing local programs characterized by coherence, continuity, and consistency.

**Contextual Language Learning** Yu-Ju Lan, Scott Grant, 2021-08-31 This book presents research and developments in the virtual, augmented technology and mixed reality used in language learning and teaching. It provides the readers with a comprehensive overview of contextual language learning with the support of immersive technology. From theoretical foundations, methodological issues, the features of virtual and augmented reality and educational practices of language learning to the future of immersive technology for and research on language learning. During the past two decades, abundant research on different realities has recognized the potential of language learning in virtual, augmented and mixed reality environments. Wang et al 2020 Lin Lan 2015 Given insufficient studies of Chinese learning in immersive contexts reported in existing literature, this book includes several excellent studies about using immersive technologies for Chinese learning in addition to other foreign language learning such as English as a foreign language (EFL). Since learning Chinese has grown significantly as a global trend, the authors vitally consolidate and synthesize various theoretical foundations, visions and recent research and practices in the context of Chinese teaching from broader and more diverse perspectives. On the other hand, the chapters about EFL learning also shed light on the research on contextual language learning. Thus the chapters

included in this book will likely provide readers with a deep and extensive understanding of the potential of the smart combination of immersive technologies and language learning More issues for future research will undoubtedly be inspired by reading the chapters in this book **The Journal of Proceedings and Addresses of the National Educational Association** National Educational Association (U.S.),1873 *The Publishers Weekly*,1878 *L2 Phonology Meets L2 Pronunciation* John Archibald,Mary Grantham O'Brien,Andrew Sewell,2022-01-24
