On The Brink Americas Choice 2012:

The American Elections of 2012 Janet M. Box-Steffensmeier, Steven E. Schier, 2013-05-29 The 2012 American elections were highly competitive with the unusually close partisan balance making the elections an opportunity for each of the two major parties. This book assembles leading political scientists and political journalists to explain the 2012 election results and their implications for America's future. In addition to assessing election results, the book examines the consequences of the large ambitions of the Obama presidency and the political and policy risks entailed in the pursuit of those ambitions. It also explores Congressional elections and policymaking since 2008 and how they affected election results in 2012. The book promises a more coherent focus than that evident in similar edited works achieved through a limited number of chapters and clear definition of chapter content.

Statements of Resolve Roseanne W. McManus, 2017-07-25 This book analyzes the conditions under which leaders can use resolved statements to effectively coerce foreign adversaries.

Sailing the Water's Edge Helen V. Milner, Dustin Tingley, 2015-09-15 How U.S. domestic politics shapes the nation's foreign policy. When engaging with other countries, the U.S. government has a number of different policy instruments at its disposal, including foreign aid, international trade, and the use of military force. But what determines which policies are chosen? Does the United States rely too much on the use of military power and coercion in its foreign policies? *Sailing the Water's Edge* focuses on how domestic U.S. politics, in particular the interactions between the president, Congress, interest groups, bureaucratic institutions, and the public, have influenced foreign policy choices since World War II and shows why presidents have more control over some policy instruments than others. Presidential power matters, and it varies systematically across policy instruments. Helen Milner and Dustin Tingley consider how Congress and interest groups have substantial material interests in and ideological divisions around certain issues and that these factors constrain presidents from applying specific tools. As a result, presidents select instruments that they have more control over, such as use of the military. This militarization of U.S. foreign policy raises concerns about the nature of American engagement, substitution among policy tools, and the future of U.S. foreign policy. Milner and Tingley explore whether American foreign policy will remain guided by a grand strategy of liberal internationalism, what affects American foreign policy successes and failures, and the role of U.S. intelligence collection in shaping foreign policy. The authors support their arguments with rigorous theorizing, quantitative analysis, and focused case studies, such as U.S. foreign policy in Sub-Saharan Africa across two presidential administrations. *Sailing the Water's Edge* examines the importance of domestic political coalitions and institutions on the formation of American foreign policy.

[On the Brink, America's Choice 2012](#) David L. Parker, 2012-06-30 David Parker offers an insider's glimpse at the coming election where we are as a nation, how we got here, and the choice before us.

He provides a substantive and stark contrast between Barack Obama and Mitt Romney. Further he shares personal insights about Governor Romney his leadership capacity experience and perspectives about America and what lies ahead. Believing that the mainstream media will shield the public from pertinent facts and information Parker provides factual statements and illustrations in summary form that offer a compelling argument why Mitt Romney should be elected President of the United States and how he can win in November. A brief tome this book delivers a concise clear and compelling depiction of America's choice in 2012. It appeals to a general population that has been solely reliant upon news outlets and the mainstream media and who has yet to delve into the substance of the November election. The book further appeals to those who are political junkies as it offers additional insights and perspectives from an insider's view. Most deliberately the book is a concise and catalytic primer to inform the reader and provoke further thought and study as we face America's defining moment. Our very freedoms are at stake in the November election and the author has sought to present an argument that the reader can absorb easily and share with others. *On the Brink* is an easy and well informed read. For anyone sitting on the fence about the November election this book is a must read.

The Pain Brokers Elizabeth Chamblee Burch, 2026-01-13. *Selling the Dream meets Empire of Pain* in this shocking never told before story of three women caught in a web of telemarketing scammers shady doctors and profit hungry lawyers who turned fears surrounding a faulty medical device affecting millions of women into a goldmine. For decades late night television has blared a familiar refrain. If you or a loved one has been injured by X product. But behind those ads lies a lesser known world where elaborate scams revictimize the injured. Why else would thousands of women with health insurance take out loans with astronomical interest rates and fly to south Florida to have their pelvic mesh surgically removed at a chiropractor's clinic. *The Pain Brokers* by law professor Elizabeth Burch is a damning investigation of a scheme made possible by a medical and legal complex that too often views women's bodies as cash machines and fails to take their pain seriously. As Burch unfurls each level to the scheme we meet an enthralling cast of characters from a world class scam artist who reaped tens of millions of dollars at a south Florida call center to the ultimate white shoe power lawyer who defended Big Pharma but became an unlikely hero to a newly minted small town Arkansas attorney who advocated for the unseen and unheard. But at the center are three women Jerri, Barb and Sharon whose lives were upended by the very procedure they were told would save them. A page turning urgently necessary work of public service journalism. *The Pain Brokers* is not only a chilling expos of a legal system gone awry but a wake up call to the ways in which it harms those it is meant to help.

Happy City Charles Montgomery, 2013-11-07. *Happy City* is the story of how the solutions to this century's problems from climate change to overpopulation lie in unlocking the secrets to great city living. This is going to be the century of the city. But what actually makes a good city? Why really are some cities a joy to live in? As writer and journalist Charles Montgomery reveals it's not how much money your neighbours earn or how spectacular the views from your

windows are or even how pleasant the climate is that makes the most difference Journeying to dozens of cities from Atlanta to Bogot to Vancouver he talks to the new champions of the happy city to discover the progressive movements already transforming people's lives He meets the visionary Colombian mayor who turned some of the world's most dangerous roads into an urban cycling haven the Danish architect who brought the lessons of medieval Tuscan towns to modern day Copenhagen the New York City transport commissioner who made out of the gridlock of Times Square a place where people could lounge in the sun and the Californian mother with the super commute who completely rethought her idea of the suburban dream for the sake of her son's health These urban trailblazers as well as the many other planners engineers grass roots campaigners and ordinary citizens offer a wealth of surprising lessons for the rest of us From how saying hello to your neighbours is just as important to your sense of trust as contact with close friends and family and how living close to parks makes us smarter kinder and reduces local crime rates to the importance of the magic triangle rule Happy City shows that simple changes can make all the difference Charles Montgomery is a journalist and urban experimentalist from Vancouver Canada His writings on urban planning psychology culture and history have appeared in magazines and journals on three continents He is the author of two previous books and is a member of the BMW Guggenheim Lab team
