On The Fourfold Root Of The Principle Of Sufficient Reason:

On the Fourfold Root of the Principle of Sufficient Reason Arthur Schopenhauer, 1974 Schopenhauer's analyses of causation and related concepts rival and probably surpass in their depth and brilliance the more celebrated discussions of David Hume. Where Hume grossly oversimplified these problems and left them riddled with paradoxes, Schopenhauer disentangled them and shed light on what had seemed hopelessly dark. Richard Taylor, University of Rochester.

Schopenhauer: On the Fourfold Root of the Principle of Sufficient Reason and Other Writings Arthur Schopenhauer, 2012-09-20 This volume of translations unites three shorter works by Arthur Schopenhauer that expand on themes from his book *The World as Will and Representation*. In *On the Fourfold Root* he takes the principle of sufficient reason which states that nothing is without a reason why it is and shows how it covers different forms of explanation or ground that previous philosophers have tended to confuse. Schopenhauer regarded this study which he first wrote as his doctoral dissertation as an essential preliminary to *The World as Will*. *On Will in Nature* examines contemporary scientific findings in search of corroboration of his thesis that processes in nature are all a species of striving towards ends and *On Vision and Colours* defends an anti-Newtonian account of colour perception influenced by Goethe's famous colour theory. This is the first English edition to provide extensive editorial notes on the different published versions of these works.

On the Fourfold Root of the Principle of Sufficien and On the Will in Nature Arthur Schopenhauer, 2016-08-26 Just as if Kant had never existed the Principle of Sufficient Reason still remains with Fichte what it was with all the Schoolmen: a *terna veritas* that is to say just as the Gods of the ancients were still ruled over by eternal Destiny so was the God of the Schoolmen still ruled over by these *terna veritates* i.e. by the metaphysical, mathematical and metalogical truths and even according to some by the validity of the moral law. These *veritates* alone were unconditioned by anything and God as well as the world existed through their necessity. Thus with Fichte the Ego according to the Principle of Sufficient Reason is the reason of the world or of the Non Ego of the Object which is the product or result of the Ego itself. He took good care therefore neither to examine nor to check the Principle of Sufficient Reason any farther. But if I had to indicate the particular form of this principle by which Fichte was guided in making the Ego spin the Non Ego out of itself as the spider its web I should point to the Principle of the Sufficient Reason of Being in Space for nothing but a reference to this principle gives any sort of sense or meaning to his laboured deductions of the way in which the Ego produces and manufactures the Non Ego out of itself which form the contents of the most senseless and simply on this account most tiresome book ever written. The only interest this Fichteian philosophy has for us at all otherwise it would not be worth mentioning lies in its being the tardy appearance of the real antithesis to ancient Materialism which was the most consistent starting from the Object just as Fichte's philosophy was the most consistent starting from the Subject.
