**On Transitions From Group Care** D Patrick Zimmerman, Richard A. Epstein Jr, 2013-04-15 Examine ways to help prepare young people for a successful transition from group care to community living. How can we best help young people in residential care settings prepare for life on the outside? The editors of *On Transitions From Group Care Homeward Bound* are devoted to helping answer the question of how providers of residential treatment services can improve the transition process when children in their care are transferred to less restrictive situations. Chapters focus on the challenges of this process when working with sexually aggressive youth, adolescents with behavioral or conduct disorders, and the families of young people in residential care facilities. You'll learn about model transitional living programs, ways to integrate family work into residential care, and programs that focus on social life skills training. *On Transitions From Group Care Homeward Bound* examines a program designed to involve parents and caregivers in the residential treatment and transition process for sexually aggressive youth, diagnosis and placement variables that affect outcomes for adolescents with behavior disorders in an outpatient mental health clinic, the redesigning of an existing residential treatment program to allow parents, caregivers, and the community a much more integral role in each child's residential treatment experience, case studies of children who have participated in the transitional living program at Bellefaire JCB, a large social service agency for children and families in the Cleveland, Ohio area, with both successful and unsuccessful outcomes, the role of social skills training programs in facilitating successful transitions from residential treatment to community life.

**Psychotherapy in Group Care** D Patrick Zimmerman, Richard A. Epstein Jr, Martin Leichtman, Maria Leichtman, 2013-12-16 Integrate psychotherapy with residential treatment to achieve positive results for patients in group care. This book addresses the complex issues that arise in the effort to provide individual therapy in group care settings. It reviews classical case material, presents contemporary case studies, and examines practical and theoretical issues important to the effective delivery of treatment to individuals living in residential care. Noted experts who have been associated with The Sonia Shankman Orthogenic School at the University of Chicago and the Menninger Clinic in Topeka, Kansas, share knowledge garnered from years of real world experience to help you stay at the leading edge of the field and provide effective individual treatment to your clients in long and short term residential care. *Psychotherapy in Group Care: Making Life Good Enough* includes practical and theoretical chapters exploring important aspects of the group care paradigm. The book presents a case study that describes vital aspects of the analytic process that emerged in work with an adolescent boy in a group home who felt as though he was a psychological orphan. It illustrates the role of play as a continuous and basic function in therapy and presents play themed vignettes from analytic work with two young people in residential care. It revisits Joey A Mechanical Boy and Tommy the Space Child, classic case studies from Bruno Bettelheim and Rudolph Ekstien, and explores the implications of contemporary relational theory for using the meaning and metaphor of behaviors and communications. It addresses issues of transference and counter transference in the psychodynamic

psychotherapy of a young girl in residential care with a discussion of unrecognized rescue fantasies and projective identification and of the need for residential childcare workers to recognize and work through the difficult feelings evoked in the process of working with seriously disturbed young people examines the structural basis for the integration of psychotherapy and residential treatment considering the meaning of integration variables that affect the manner and degree to which integration can be accomplished and changes in the psychotherapists roles that can maximize the potential of each variable explores three sets of theoretical issues facing clinicians as they play multiple roles in short term residential treatment discussing how conflicts in the roles of therapists and team leaders can be resolved the implications of such a resolution in terms of confidentiality and ways in which major approaches to psychotherapy can be adapted to new conditions considers the role of the primary clinician in relation to the residential team and explores the ways in which integration of psychotherapy and residential treatment can be implemented in the early phase of the treatment process
