Promoting Organizational Performance Through 5G and Agile Marketing Santos, José Duarte, Sousa, Bruno Miguel, 2022-09-30 It is well understood that many business operations are evolving to fit within the mold of society's technological advancement. This is no different for marketing. While there are indicators proving the evolution of marketing, there are still many questions that must be addressed when examining the changes made to the field: whether this evolution will force new tactics, whether it will be reduced to technological tools, and more. These questions must be answered in order to allow organizations to be more customer oriented and competitive. *Promoting Organizational Performance Through 5G and Agile Marketing* provides knowledge and skills to allow readers the ability to understand the evolution and trends of marketing as well as its implications in organizations and customer relationships. It consolidates concepts introduced in recent years and examines possible opportunities to broaden the breadth of marketing, demonstrating its interdisciplinarity. Covering topics such as loyalty programs, brand attachment, and purchase intention, this premier reference source is an excellent resource for business leaders and executives, brand managers, IT managers, marketers, communications professionals, students, and faculty of higher education, librarians, researchers, and academicians. [ECRM 2018 17th European Conference on Research Methods in Business and Management](#) Prof. Michela Marchiori, 2018-07-12 These proceedings represent the work of researchers participating in the 17th European Conference on Research Methodology for Business and Management Studies (ECRM), which is being hosted this year by Università Roma TRE, Rome, Italy, on 12-13 July 2018.

Non-Profit Organisations, Volume II Alkis Thrassou, Demetris Vrontis, Leonidas Efthymiou, Yaakov Weber, S. M. Riad Shams, Evangelos Tsoukatos, 2024-08-09 This four-volume book examines through multiple and cross-discipline perspectives the science and practice of not-for-profit organisations. These organisations have drawn considerable attention and witnessed extensive growth as they engage in delivering public services to society. And are increasingly pressured to balance business with social goals, inherent idiosyncratic features, with management creativity, structural limitations, with operational flexibility, and ethical boundaries, with pragmatism, all with scarce resources but abundant determination. The first volume explores the opportunities and challenges of non-profit organisations in the contemporary environment, elucidating current and future issues in the field, setting strategic directions, and presenting sector-wide examples and best practices. The second volume explores contextual aspects relating to the economy and industries. The third volume presents social and ethical aspects as well as matters of sustainability, accountability, and the overall wellbeing of society. The fourth and final volume examines structures and models with an emphasis on technology.

Artist Management in the Music Industries Yiyi Wang, 2024-11-19 *Artist Management in the Music Industries: A Sui Generis Form of Management* provides one of the first substantive academic examinations of the role of an artist manager. This book deconstructs the nature of Artist Management, unveiling the pivotal role of the artist manager in creating and sustaining a dynamic environment referred to as the Loop.

where success is realised by navigating four variables Risks Relationships Emotions and Expectations 2Rs and 2Es within and beyond the Loop This book offers a new perspective on Artist Management as a sui generis discipline that does not fit easily inside standard conceptions of management Featuring ethnography and interviews this book sheds light on the realworld challenges and successes in the field It is a must read for researchers students and practitioners in the music business music marketing and artist management offering invaluable insights into the practices that shape the cultural landscape

The Economic and Labour Relations Review, 2004 *Management* Tim Hannagan, Roger Bennett, 2005 By combining a friendly style with authoritative content and a wide range of practical examples this book has proved an ideal key text for a wide variety of undergraduate courses Stuart Wall Anglia Polytechnic University Dr Tim Hannagan has worked in sales and general management for companies in the UK and abroad He has worked in both the public and private sectors and in further and higher education including more than ten years as principal and chief executive of a further education corporation www.pearsoned.co.uk Focus on Growth Patricia Coate, 2007 What do AT T Coca Cola Digital Equipment GM IBM and McDonald s have in common For one thing they all enjoyed decades of enviable profits and were leaders in their industries What else do they have in common They all took unexpected tumbles and fell from grace Why were these great organizations unable to sustain their profitable paths and growth The answer to this and other probing questions about how companies do or don t sustain and accelerate growth can be found in the latest compilation of articles that are part of this e book **Ulrich's Periodicals Directory 2003** Edgar H. Adcock (Jr.), 2002 The British National Bibliography Arthur James Wells, 2009 "*The Academy of Management Journal*", 2008-12 Research Methods for Managers John Gill, Phil Johnson, 2002-10-03 This new edition helps management students with the methods they need when undertaking their proeject work be it at first degree diploma MBA or doctorate level The text incorporates feedback from a range of researchers educators and students with new examples of management research included **Organisational Psychology in Australia and New Zealand** Michael P. O'Driscoll, Paul J. Taylor, Thomas Kalliath, 2003 Organisational psychology also know as industrial and organisational I O psychology is a dynamic and pervasive field within the general discipline of psychology Organisational psychology focuses on people attitudes values and behaviours in the domain of work especially within organisational settings such as private businesses government organisations the military and so on The field covers a very wide range of issues ranging from the selection of individual people for specific jobs through to the management of large scale organisational change and development Organisational psychologists therefore contribute to a broad array of processes and functions within organisations While many textbooks relating to organisational psychology are available almost all of these have been developed in either the United States or the United Kingdom and hence refer to conditions applying predominantly in those countries Consequently although much of the theory and research described in these texts is of a general nature there is some lack of direct practical relevance to Australian and New Zealand conditions Furthermore the considerable amount of research conducted within these two countries is frequently overlooked in other international texts

The purpose of this textbook is therefore to provide a coverage of essential topics in the field of organisational psychology as far as possible to introduce research illustrations from Australia and New Zealand as well as international research in each topic area and incorporate Australian and New Zealand examples and case studies to illustrate the local relevance of theory and research Each chapter contains a practice illustration and a case study relating to either Australia or New Zealand Questions for discussion at the end of each chapter will focus on issues that are directly relevant to students in these two countries
