Employability via Higher Education: Sustainability as Scholarship Alice Diver, 2019-09-23

This book discusses the topic of graduate employability from the premise that in this era of massification, economic austerity, and political uncertainties, higher education (HE) no longer guarantees a clear work place advantage. Divided into three sections, the book offers theoretical and philosophical discourses on the HE quandary whilst taking into account and critiquing political, temporal, and national contexts. It culminates in an investigation into specific discipline areas. It offers insights into the way that institutions, decision makers, academics, and professional support staff can work together towards ensuring that our graduates are able to cope with the varied demands and challenges of modern job markets. It harnesses arguments and reflections on the breadth and depth of the functions of HE such as social transformation, promoting principles of social justice, and providing opportunities. It grounds these in a triadic model for enhancing student engagement and holistic learning, namely the emotional, cognitive, and behavioural aspects. As an anthology, it is forward gazing in terms of the sustainability debate whilst still offering evidence-based research-grounded practical suggestions to readers looking for tips and tools of the trade.
