**Medicine, Mind, and the Double Brain** Anne Harrington, 2021-04-13 The description for this book *Medicine Mind and the Double Brain A Study in Nineteenth Century Thought* will be forthcoming

**Popular Fiction and Brain Science in the Late Nineteenth Century** Anne Stiles, 2011-12-22 In the 1860s and 1870s leading neurologists used animal experimentation to establish that discrete sections of the brain regulate specific mental and physical functions These discoveries had immediate medical benefits David Ferrier's detailed cortical maps for example saved lives by helping surgeons locate brain tumors and haemorrhages without first opening up the skull These experiments both incited controversy and stimulated creative thought because they challenged the possibility of an extra corporeal soul This book examines the cultural impact of neurological experiments on late Victorian Gothic romances by Robert Louis Stevenson Bram Stoker H G Wells and others Novels like *Dracula* and *Dr Jekyll and Mr Hyde* expressed the deep seated fears and visionary possibilities suggested by cerebral localization research and offered a corrective to the linearity and objectivity of late Victorian neurology

**The Poet's Mind** Gregory Tate, 2012-11-08 *The Poet's Mind* is a comprehensive study of the ways in which Victorian poets thought and wrote about the human mind It argues that these poets used their writing both to express psychological processes of thought and feeling and to subject those processes to scrutiny and analysis

Neurology and Literature, 1860-1920 Anne Stiles, 2007-09-28 The essays in this collection demonstrate how late Victorian and Edwardian neurology and fiction shared common philosophical concerns and rhetorical strategies Between 1860 and 1920 neurologists like Silas Weir Mitchell and Oliver Wendell Holmes wrote moving literature while novelists like H G Wells and Wilkie Collins used fiction to dramatize neurological discoveries and their consequences These six decades witnessed unprecedented interdisciplinary collaboration between scientists and artists who found common ground in their shared ambivalence towards the prevailing intellectual climate of biological determinism

Dark Galatea 2 2 and The Echo Maker are inspired by Jacques Lacan's image of cognition as a Mobius strip on which different forms of propositional and non propositional knowledge bleed into and depend upon one another Drawing on feminist epistemology and psychoanalysis this study highlights Powers's interest in the non propositional aspects of cognition that is in all that escapes the frameworks of scientific empiricism and can only be known through the mediation of fictional narrative It reveals a deep dissatisfaction in the novels with the suggestion that knowledge and understanding must be objective and rational and elucidates Powers's idea that fiction can be a powerful tool for integrating various kinds of knowledge
