weer zo dichtbij te laten komen 6 FATALE VLUCHT Natalie Freiman kon alleen aan Damien haar criminele echtgenoot ontkomen door te doen alsof ze dood was Al zes jaar lang lukt het haar om buiten beeld te blijven Tot op een dag twee leden van Omega Sector voor haar deur staan met de vraag waar Damien is Zodra de twee weg zijn slaat ze op de vlucht Het wordt een tocht vol hindernissen waarbij ze gelukkig hulp krijgt van Ren Thompson een man die ze onderweg leert kennen Wat ze niet weet is dat hij zijn eigen redenen heeft om haar te helpen Deze boeken zijn ook los verkrijgbaar *Meesterbrein I.Q. 10.000* Alfred Elton Van Vogt, 1973 **Nederlandsch letterkundig nieuwsblad**, 1978 **Brinkman's cumulatieve catalogus van boeken**, 1977 Voorts een alphabetische lijst van Nederlandsche boeken in Belgi uitgegeven *Outsmarting IQ* David Perkins, 1995-03-01 Since the turn of the century the idea that intellectual capacity is fixed has been generally accepted But increasingly psychologists educators and others have come to challenge this premise Outsmarting IQ reveals how earlier discoveries about IQ together with recent research show that intelligence is not genetically fixed Intelligence can be taught David Perkins renowned for his research on thinking learning and education identifies three distinct kinds of intelligence the fixed neurological intelligence linked to IQ tests the specialized knowledge and experience that individuals acquire over time and reflective intelligence the ability to become aware of one's mental habits and transcend limited patterns of thinking Although all of these forms of intelligence function simultaneously it is reflective intelligence Perkins shows that affords the best opportunity to amplify human intellect This is the kind of intelligence that helps us to make wise personal decisions solve challenging technical problems find creative ideas and learn complex topics in mathematics the sciences management and other areas It is the kind of intelligence most needed in an increasingly competitive and complicated world Using his own pathbreaking research at Harvard and a rich array of other sources Perkins paints a compelling picture of the skills and attitudes underlying learnable intelligence He identifies typical pitfalls in multiple perspectives and neglecting evidence He reveals the underlying mechanisms of intelligent behavior And he explores new frontiers in the development of intelligence in education business and other settings This book will be of interest to people who have a personal or professional stake in increasing their intellectual skills to those who look toward better education and a more thoughtful society and not least to those who follow today's heated debates about the nature of intelligence **IQ - das Experiment** Brian Caswell, 2006 **IQ and Human Intelligence** Nicholas John Mackintosh, 1998 What is intelligence may seem like a simple question to answer but the study and measurement of human intelligence is one of the most controversial subjects in psychology For much of its history the focus has been on differences between people on what it means for one person to be more intelligent than another and how such differences might have arisen obscuring efforts to understand the general nature of intelligence These are obviously fundamental questions still widely debated and misunderstood New definitions of intelligence and new factors affecting intelligence are frequently being described while psychometric testing is applied in most large industries IQ and Human Intelligence provides a clear authoritative overview of

the main issues surrounding this fascinating area including the modern development of IQ tests the heritability of intelligence theories of intelligence environmental effects on IQ factor analysis relationship of cognitive psychology to measuring IQ and intelligence in the social context The clear accessible style and numerous explanatory boxes make this the ideal text for advanced undergraduate and graduate students in psychology *IQ* Stephen Murdoch, 2007 While IQ tests have some predictive power they don't explain people's capacity to think and understand the world around them This work reveals how universal education immigration into the US in the early 20th century and the demands of mobilisation in the First World War created the need to rank populations by intelligence
