**Handbook on Planning and Complexity** Gert de Roo, Claudia Yamu, Christian Zuidema, 2020-06-26 This Handbook shows the enormous impetus given to the scientific debate by linking planning as a science of purposeful interventions and complexity as a science of spontaneous change and non linear development Emphasising the importance of merging planning and complexity this comprehensive Handbook also clarifies key concepts and theories presents examples on planning and complexity and proposes new ideas and methods which emerge from synthesising the discipline of spatial planning with complexity sciences *Artificial Intelligence and the City* Federico Cugurullo, Federico Caprotti, Matthew Cook, Andrew Karvonen, Pauline McGuirk, Simon Marvin, 2023-12-01 This book explores in theory and practice how artificial intelligence AI intersects with and alters the city Drawing upon a range of urban disciplines and case studies the chapters reveal the multitude of repercussions that AI is having on urban society urban infrastructure urban governance urban planning and urban sustainability Contributors also examine how the city far from being a passive recipient of new technologies is influencing and reframing AI through subtle processes of co constitution The book advances three main contributions and arguments First it provides empirical evidence of the emergence of a post smart trajectory for cities in which new material and decision making capabilities are being assembled through multiple AIs Second it stresses the importance of understanding the mutually constitutive relations between the new experiences enabled by AI technology and the urban context Third it engages with the concepts required to clarify the opaque relations that exist between AI and the city as well as how to make sense of these relations from a theoretical perspective *Artificial Intelligence and the City* offers a state of the art analysis and review of AI urbanism from its roots to its global emergence It cuts across several disciplines and will be a useful resource for undergraduates and postgraduates in the fields of urban studies urban planning geography architecture urban design science and technology studies sociology and politics **Ecopolis** Dimitra Babalis, 2007 *Complexity and Creative Capacity* Kelly Chapman, 2015-11-06 Complexity theories gained prominence in the 1990s with a focus on self organising and complex adaptive systems Since then complexity theory has become one of the fastest growing topics in both the natural and social sciences and touted as a revolutionary way of understanding the behaviour of complex systems This book uses complexity theory to surface and challenge the deeply held cultural assumptions that shape how we think about reality and knowledge In doing so it shows how our traditional approaches to generating and applying knowledge may be paradoxically exacerbating some of the wicked environmental problems we are currently facing The author proposes an innovative and compelling argument for rejecting old constructs of knowledge transfer adaptive management and adaptive capacity The book also presents a distinctively coherent and comprehensive synthesis of cognition learning knowledge and organizing from a complexity perspective It concludes with a reconceptualization of the problem of knowledge transfer from a complexity perspective proposing the concept of creative capacity as an alternative to adaptive capacity as a measure of
