Nice Book Madness Memory Discovery Prions Biological:

Madness and Memory Stanley B. Prusiner, 2014-04-28 In this utterly fascinating science memoir the Nobel Prize winning author chronicles his revolutionary discovery of a major cause of brain diseases The New York Times In 1997 Stanley B Prusiner received the Nobel Prize in Physiology or Medicine for his research on devastating brain diseases That he was the award s sole recipient was entirely appropriate His struggle to identify the agent responsible for scrapie and mad cow disease in animals and Creutzfeldt Jakob disease in humans had been waged largely alone and in some cases in the face of strenuous opposition In Madness and Memory Prusiner recounts the journey to his remarkable discovery of prions infectious proteins that replicate and cause disease but surprisingly contain no genetic material Along the way he sheds light on the world of contemporary science and the meticulousness and perseverance it requires Through his telling the agony and triumph of years of research comes to life along with fascinating portraits of fellow scientists racing to make breakthrough discoveries Prusiner s hypothesis once considered heresy now stands as accepted science and provides a path toward conquering such pervasive scourges as Alzheimer s Parkinson s Lou Gehrig s and others diseases Madness and Memory is the story of one of the most important discoveries in recent medical history and it is also a vivid and compelling portrait of a life in science Oliver Sacks MD neurologist and author of Hallucinations

Optical Technology Transfer and Innovation in Ophthalmic Imaging Barry R. Masters, 2025-10-30 This book presents a new view of symbiotic technology transfer between different fields in the optical sciences For example adaptive optics were initially developed for military research programs seeking to correct the effects of atmospheric fluctuations on telescopes The technology was subsequently transferred to optical microscopes and then finally used in ophthalmic imaging devices to image photoreceptors in the living human retina This book examines various recent and historical technology transfers among the optical sciences and attempts to answer the following questions What are the mathematical and the physical foundations of these technology advances What events and influences military requirements new journals new funding sources the internet etc made the technologies and their transfer possible What was the impact of technology transfer on the development of optical science What role did the human eye and visual system play in technology development This book examines how innovations propagate from one field to another illustrating the benefits of cross disciplinary collaboration This book is about curiosity skepticism innovation and creativity in science and technology and explores practices that advance innovation and those that inhibit innovation Analyses of some selected pertinent case studies highlight the roles of unique individuals who were able to make the journey from initial concept to widespread clinical acceptance of their instruments What are the common factors of their education experiences and approaches that resulted in their inventions and innovations This book is intended to inspire and encourage those who dream of advancing the diagnostics and the treatment of diseases through new medical devices It also addresses budding startup dreamers venture capitalists research directors and funding agency administrators by providing new insights into

practices that promote and inhibit innovation This book should be of interest to scientists and researchers in many fields of optics as well as technical policy makers at funding institutions

Nobel Prizes And Notable Discoveries Erling Norrby, 2016-09-06 The present book discusses the prizes in physiology or medicine 1963 65 The 1963 prize recognized milestone discoveries in the field of neurosciences the way electrical impulses are generated and spread in nerves The impressive developments of insights into tantalizing brain functions like consciousness and memory is discussed in the perspective of prizes both before and after the 1963 prize The prize in 1964 marked the advanced biochemical venture that led to a full understanding of the synthesis of cholesterol a central molecule for providing flexibility of the membranes of the trillions of cell in our body The importance of this molecule for the appearance of cardiovascular diseases and the possibilities to prevent them is presented in the light of other prizes earlier and later in this field The 1965 prize recognized three impressive French intellectuals Lwoff Monod and Jacob Their contributions allowed the full maturation of the initial phase of the emerging field of molecular biology The comprehension of the information flow from DNA via RNA to proteins was the source of a revolution of life sciences and of medicine

Biology of memory ,1970 The Making of Memory Steven Peter Russell Rose, 1993 Combining a richly detailed account of scientists at work with a highly readable explanation of cutting edge neuroscience this book offers fascinating new insights on the cellular mechanisms of memory and learning
