It is strongly recommended that you follow these step-by-step numbered instructions to set up and quickly begin using your new Digital Camera.

For more detailed instructions on advanced features, please refer to the printed Basic Manual included in your package, or the Reference Manual on the CD-ROM.

1 UNPACKING THE BOX CONTENTS

Gather your digital camera and the parts as shown in the illustration. You'll need these to complete the steps for the camera setup procedures that follow.

The following items are also included in this package: Basic Manual, video cable, warranty card, registration card (not provided in some areas), and safety precautions booklet.

2 PREPARE THE CAMERA FOR USE

Before you begin using your Olympus digital camera...

a. Loading batteries

- Slide the battery compartment cover in the direction of ① (the direction indicated by the mark on the cover), and lift it up in the direction of ②.

- Insert batteries in the direction shown in the illustration.

There is a mark on the bottom of the camera showing the correct way to insert batteries.

- Close the battery compartment cover so that it pushes the batteries down inside. While pressing the mark, slide the cover in the opposite direction of ①.
- As an optional Olympus DPM AC adapter is available, use a computer when downloading images to ensure a constant power supply. See the Basic Manual for more information.

b. Insert the xD-Picture Card

The xD-Picture Card is where the camera stores your pictures and is available in a variety of memory capacities. The pictures you take with the camera reside on the xD-Picture Card even when the camera is turned off and/or the batteries are removed.

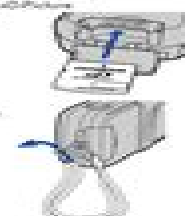

- Insert the xD-Picture Card into the spring-loaded card slot as shown in the illustration, push the card fully into the slot. The card will lock into place when fully inserted.
- To remove, push down on the xD-Picture Card. The card will pop up. Pull to remove.

- Close the card cover.

Confirm you have installed the batteries and xD-Picture Card properly by pressing OK. The "No Picture" message should be displayed in the monitor. Turn the camera off by pressing OK again.

c. Attach the strap accessory

Attach the strap as illustrated to make the camera easier to handle.

3 TURNING ON THE CAMERA

All you need to do is slide the lens shutter open or closed to turn the camera ON or OFF.

a. Turn the camera ON (shooting mode)

- Open the lens shutter.
- Close the lens shutter to turn the camera off.

When the camera is turned on, the display screen shows a camera setting guide in which the camera enters a sleep mode after approximately 10 seconds. Press the OK button to wake up the camera.

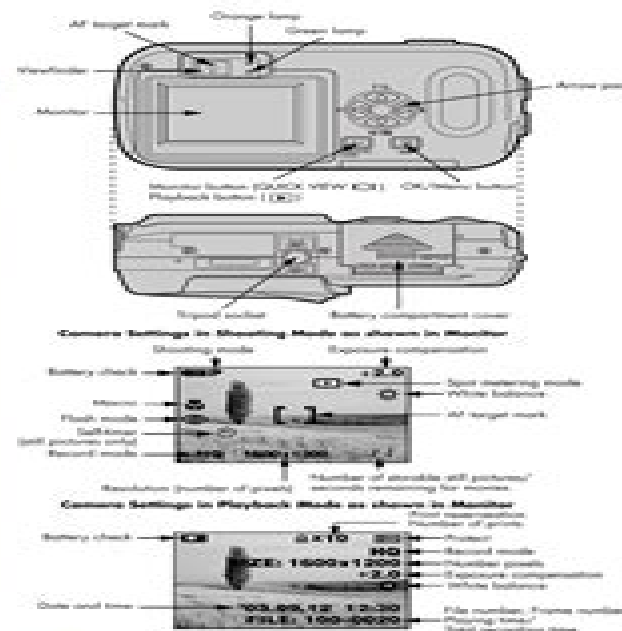

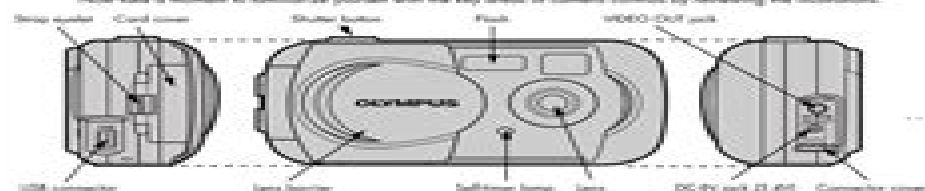

b. Set the Date and Time accessory

Although this is not required, it is recommended that you set the date and time. This affects the way images are created, and will conveniently include this information with each picture. The date and time can also be set when the camera is in the playback mode.

- Open the lens shutter fully until it clicks.
- Press OK to display the menu.
- Press to select MISC (MENU).
- Press three times to select SETUP.
- Press twice, and then twice to highlight DATE, and then press OK.
- Use to select the date format.
- Follow the date and time on the appropriate field by using to select the field, and to set the proper value. Repeat this step until all date/time fields have been set.
- Press OK to enter the date and time using the 24-hour format.
- Press OK twice to set the date and time and exit the menu.

c. Camera Diagram and Controls

Now take a moment to familiarize yourself with the key areas of camera controls by reviewing the illustrations.

OK: Always
* Depending on the camera settings, not all indicators will be displayed.
